## Framing Dimensions:

- **A** Header Height: 32-11/16" (82 mm)
- **B** Side Stud Width: 42 - 3/16" (1072 mm)
- **C** Minimum framing depth: 29" (737 mm)
- **D** Minimum Height to Combustibles: 52 - 1/2" (1334 mm)
- **E** Minimum framing width: 60" (1524 mm)
- **F** Corner Wall Depth: 40 - 7/16" (1027 mm)
- **G** Corner Facing Wall Width: 54 - 3/16" (1376 mm)
- **H** Gas Connection Opening Height: 3" (76 mm)
- **I** Gas Connection Height: 3-7/8" (98 mm)
- **J** Gas Connection Inset: 3/4" (73 mm)
- **K** Gas Connection Opening Width: 3-7/8" (98 mm)

* Framing depth measurement is noted with the nailing strips set as far forward on the firebox as possible. The nailing strips can be adjusted back up to 1" to allow for varying thicknesses in non-combustible material & wall finishes.

Note: All other framing may be of wood construction.

### Unit Dimensions:

![Unit Dimensions Diagram]

- **A**: Header Height: 32-11/16" (82 mm)
- **B**: Side Stud Width: 42 - 3/16" (1072 mm)
- **C**: Minimum framing depth: 29" (737 mm)
- **D**: Minimum Height to Combustibles: 52 - 1/2" (1334 mm)
- **E**: Minimum framing width: 60" (1524 mm)
- **F**: Corner Wall Depth: 40 - 7/16" (1027 mm)
- **G**: Corner Facing Wall Width: 54 - 3/16" (1376 mm)
- **H**: Gas Connection Opening Height: 3" (76 mm)
- **I**: Gas Connection Height: 3-7/8" (98 mm)
- **J**: Gas Connection Inset: 3/4" (73 mm)
- **K**: Gas Connection Opening Width: 3-7/8" (98 mm)

* Framing depth measurement is noted with the nailing strips set as far forward on the firebox as possible. The nailing strips can be adjusted back up to 1" to allow for varying thicknesses in non-combustible material & wall finishes.

Note: All other framing may be of wood construction.

HZO42 Gas Fireplace

**Clearance Requirements:**

<table>
<thead>
<tr>
<th>Clearance:</th>

<tr>
<td>C: Mantel Height</td>
<td>26-1/2&quot; (673mm)</td>
<td>Top of Fireplace Opening</td>
</tr>
<tr>
<td>D: Mantel Depth</td>
<td>12&quot; (304mm)</td>
<td>From Wall</td>
</tr>
<tr>
<td>E: Alcove Width</td>
<td>57&quot; (1148mm)</td>
<td>Wall to Wall (Minimum)</td>
</tr>
<tr>
<td>F: Alcove Depth</td>
<td>36&quot; (914mm)</td>
<td>Front to Back Wall (Maximum)</td>
</tr>
</tbody>
</table>

**Notes:**
- 0" No Hearth Required

**Combustible Mantels:**

Due to the extreme heat this fireplace emits, the mantel clearances are critical. Combustible mantel clearances from top of front facing are shown in the diagram on the right.

**Note:** Ensure the paint that is used on the mantel and the facing is “heat resistant” or the paint may discolour.
FINISHING

IMPORTANT FINISHING DETAIL NOTE:

Before placing unit into final position - it is important to know the total thickness / height of finished hearth. The base of the fireplace should be level or higher than the finished hearth height.

Non-Combustible Requirements:
1) When selecting a location for your fireplace, ensure that the clearances are met.

2) This appliance must be installed in an open-air situation with natural ventilation, without stagnant areas, where gas leakage and products of combustion are rapidly dispersed by wind and natural convection.

3) Certain materials or items, when placed under or near the appliance, will be subjected to radiant heat and could become damaged.

4) Typically an outdoor space is not enclosed but, any enclosure in which the appliance is used shall comply with one of the following:

   An enclosure with walls on all sides, but at least one permanent opening at ground level and no overhead cover.

Within a partial enclosure that includes an overhead cover and no more that two walls.

Within a partial enclosure that includes an overhead cover and more than two walls, the following shall apply:

   - At least 25% of the total wall area is completely open, and
   - At least 30% of the remaining wall area is open and unrestricted

30% or more in total of the remaining wall area is open and unrestricted.

Open side at least 25% of total wall area
