WARNING: FOR OUTDOOR USE ONLY

⚠ WARNING:
If the information in these instructions are not followed exactly, a fire or explosion may result causing property damage, personal injury or loss of life.

⚠ WARNING:
Improper installation, adjustment, alteration, service or maintenance can cause injury or property damage. Read the installation, operating and maintenance instructions thoroughly before installing or servicing this equipment.

Installation and service must be performed by a qualified installer, service agency or the gas supplier

⚠ WARNING - FOR YOUR SAFETY
What to do if you smell gas:
• Shut off gas to the appliance.
• Do not try to light any appliance.
• Extinguish any open flame.
• If odor continues, keep away from the appliance and immediately call your gas supplier or fire department.
• Do not touch any electrical switch: do not use any phone in your building.
• Immediately call your gas supplier from a neighbour's phone.
• Follow the gas supplier's instructions.
• If you cannot reach your gas supplier, call the fire department.

⚠ WARNING:
Do not store or use gasoline or other flammable vapours and liquids in the vicinity of this or any other appliance. A LP - cylinder not connected for use shall not be stored in the vicinity of this or any other appliance.

Installer: Please complete the details on the back cover and leave this manual with the homeowner.
Homeowner: Please keep these instructions for future reference.

To the New Owner:

Congratulations!

You are the owner of a state-of-the-art Outdoor Decorative Gas Appliance by REGENCY®. The Plateau® Series Outdoor Decorative Gas Appliance has been designed to provide you with all the warmth and charm of a fire at the flick of a switch. The Plateau® Series Outdoor Decorative Gas Appliance has been approved by Warnock Hersey/Intertek for both safety and efficiency. As it also bears our own mark, it promises to provide you with economy, comfort and security for many trouble free years to follow. Please take a moment now to acquaint yourself with these instructions and the many features of your Regency® decorative gas appliance.

PTO30CFT

PTO30IST

PTO30CKT

DANGER

CARBON MONOXIDE HAZARD

This appliance can produce carbon monoxide which has no odor.

Using it in an enclosed space can kill you.

Never use this appliance in an enclosed space such as a camper, tent, car or home.

WARNING!

**HOT GLASS WILL
CAUSE BURNS**

**DO NOT TOUCH GLASS
UNTIL COOLED**

**NEVER ALLOW CHILDREN
TO TOUCH GLASS**

We recommend that our products be installed and serviced by professionals who are certified in the U.S. by the National Fireplace Institute® (NFI) or in Canada by Wood Energy Technical Training (WETT).

SAFETY LABEL

This is a copy of the label that accompanies each Regency® Series Outdoor decorative gas appliance. We have printed a copy of the contents here for your review.

NOTE: Regency® units are constantly being improved. Check the label on the unit and if there is a difference, the label on the unit is the correct one.

COPY OF SAFETY DECAL

For the State of Massachusetts, installation and repair must be done by a plumber or gas fitter licensed in the Commonwealth of Massachusetts.

For the State of Massachusetts, flexible connectors shall not exceed 36 inches in length.

For the State of Massachusetts, the appliances individual manual shut-off must be a t-handle type valve.

INSTALLATION

IMPORTANT MESSAGE SAVE THESE INSTRUCTIONS

The Plateau® Series Outdoor Decorative Gas Appliance must be installed in accordance with these instructions. Carefully read all the instructions in this manual first. Consult the "authority having jurisdiction" to determine the need for a permit prior to starting the installation. It is the responsibility of the installer to ensure this decorative gas appliance is installed in compliance with manufacturers instructions and all applicable codes.

BEFORE YOU START

Safe installation and operation of this appliance requires common sense, however, we are required by the Canadian Safety Standards and ANSI Standards to make you aware of the following:

INSTALLATION AND REPAIR SHOULD BE DONE BY AN AUTHORIZED SERVICE PERSON. THE APPLIANCE SHOULD BE INSPECTED BEFORE USE AND AT LEAST ANNUALLY BY A PROFESSIONAL SERVICE PERSON. IT IS IMPERATIVE THAT CONTROL COMPARTMENTS, BURNERS AND CIRCULATING AIR PASSAGEWAYS OF THE APPLIANCE BE KEPT CLEAN.

ANY GUARD OR OTHER PROTECTIVE DEVICE REMOVED FOR SERVICING THE APPLIANCE MUST BE REPLACED PRIOR TO OPERATING THE APPLIANCE

WARNING: FAILURE TO INSTALL THIS APPLIANCE CORRECTLY WILL VOID YOUR WARRANTY AND MAY CAUSE A SERIOUS FIRE.

CHILDREN AND ADULTS SHOULD BE ALERTED TO THE HAZARDS OF HIGH SURFACE TEMPERATURES, ESPECIALLY THE DECORATIVE GAS APPLIANCE GLASS AND FACEPLATE, AND SHOULD STAY AWAY TO AVOID BURNS OR CLOTHING IGNITION.

THIS APPLIANCE SHALL BE USED ONLY OUTDOORS IN A WELL-VENTILATED SPACE AND SHALL NOT BE USED IN A BUILDING, GARAGE OR ANY OTHER ENCLOSED AREA.

DO NOT USE THIS APPLIANCE IF ANY PART HAS BEEN UNDER WATER. IMMEDIATELY CALL A QUALIFIED SERVICE TECHNICIAN TO INSPECT THE APPLIANCE AND TO REPLACE ANY PART OF THE CONTROL SYSTEM AND ANY GAS CONTROL WHICH HAS BEEN SUBMERGED UNDER WATER.

CLOTHING OR OTHER FLAMMABLE MATERIAL SHOULD NOT BE PLACED ON OR NEAR THE APPLIANCE.

SOLID FUELS SHALL NOT BE BURNED IN THIS APPLIANCE.

YOUNG CHILDREN SHOULD BE CAREFULLY SUPERVISED WHEN THEY ARE IN THE SAME AREA AS THE APPLIANCE. TODDLERS, YOUNG CHILDREN AND OTHERS MAY BE SUSCEPTIBLE TO ACCIDENTAL CONTACT BURNS. A PHYSICAL BARRIER IS RECOMMENDED IF THERE ARE AT RISK INDIVIDUALS IN THE HOUSE. TO RESTRICT ACCESS TO A DECORATIVE GAS APPLIANCE OR STOVE, INSTALL AN ADJUSTABLE SAFETY GATE TO KEEP TODDLERS, YOUNG CHILDREN AND OTHER AT RISK INDIVIDUALS OUT OF THE ROOM AND AWAY FROM HOT SURFACES.

GENERAL SAFETY INFORMATION

- 1) The installation must conform with local codes or, in the absence of local codes, with *CAN/CSA-B149.1*, Natural Gas and Propane Installation Code or *CAN/CSA-B149.2*, Propane installation code the Natural Gas Fuel Code, *ANSI Z223.1/NFPA 54*.
- 2) See general construction and assembly instructions. The appliance should be enclosed.
- 3) The LP-gas supply cylinder to be used must be: (a) Constructed and marked in accordance with the U.S. Department of Transportation (D.O.T.) Specifications for LP-Gas Cylinders, or the Standard for Cylinders, Spheres and Tubes for Transportation of Dangerous Goods and Commission, *CAN/CSA-B339* as applicable; (b) Provided with a listed overfilling prevention device; and (c) Provided with a cylinder connection device compatible with the connection for the appliance.
- 4) Inspect the burner before each use of the appliance for blockage and any signs of deterioration.

5) DO NOT SIT OR STAND ON DECORATIVE GAS APPLIANCE

6) To prevent injury, do not allow anyone who is unfamiliar with the operation to use the decorative gas appliance.

7) Wear gloves and safety glasses for protection while doing required maintenance.

8) Maximum gas inlet pressure = 1/2 psig.

9) Under no circumstances should this appliance be modified. Parts that have to be removed for servicing should be replaced prior to operating this appliance.

10) Installation and any repairs to this appliance should be done by a qualified service person. A professional service person should be called to inspect this appliance annually. Make it a practice to have all of your gas appliances checked annually.

11) Under no circumstances should any solid fuels (wood, paper, cardboard, coal, etc.) be burned in this appliance.

12) The appliance and its individual shutoff valve must be disconnected from the gas supply piping system during any pressure testing of that system at test pressures in excess of 1/2 psi (3.5kPa). The appliance must be isolated from the gas supply piping system by closing its individual manual shutoff valve during any pressure testing of the gas supply piping system at test pressures equal to or less than 1/2 psi (3.5 kPa).

13) The appliance area must be kept clear and free of combustible materials, (gases and other flammable vapours and liquids).

It is highly recommended to protect the interior from moisture (rain, snow). Cover the enclosure opening when not in use. This decorative gas appliance is only for use with the type of gas indicated on the rating plate. This decorative gas appliance is not convertible for use with other gases, unless a certified kit is used.

14) Cover **must** be removed when burner is in operation.

15) When not using appliance for extended periods of time - turn off gas supply.

16) The 4 levelling legs or optional casters on this appliance must not be removed. These are for safety and must remain on the appliance.

Emissions from burning wood or gas could contain chemicals known to the State of California to cause cancer, birth defects or other reproductive harm.

INSTALLATION CHECKLIST

- 1) Appliance is factory equipped for Natural Gas. When using Propane, see LP conversion section in this manual. For LP - use a maximum 11 pound tank or direct hard pipe from an external LP supply.
- 2) Locate appliance:
 - a) Refer to "Locating Your Outdoor decorative gas appliance" section
 - b) Clearances to Combustibles (Refer to "Clearances" section)
- 3) Gas Connection - for ease of installation and gas connection, remove left side panel (one facing ON/OFF switch. Test for leaks..
- 4) Install 4 "AA" batteries into battery pack and replace into battery compartment holder. **DO NOT USE A 9V battery.**
- 5) Connect the ON/OFF switch wires to the switch.
- 6) Install standard and optional features. Refer to the following sections:
 - a. Tabletop Installation
 - b. Glass Crystals
 - c. Volcanic Stone Installation (optional)
 - d. Log Installation (optional)
 - e. Glass Surround Installation (optional)
 - f. Weather Cover Installation

7) Final check.

This includes:

- 1) Clocking the appliance to ensure the correct firing rate (rate noted on label), after burning appliance for 15 minutes.
- 2) If required, adjusting the primary air to ensure that the flame does not carbon. First allow the unit to burn for 15-20 min. to stabilize.

CAUTION: Any alteration to the product that causes sooting or carboning that results in damage is not the responsibility of the manufacturer.

LOCATING YOUR OUTDOOR DECORATIVE GAS APPLIANCE

- 1) When selecting a location for your outdoor decorative gas appliance, ensure that the clearances are met.
- 2) This appliance must be installed in an open-air situation with natural ventilation, without stagnant areas, where gas leakage and products of combustion are rapidly dispersed by wind and natural convection.
- 3) Certain materials or items, when placed under or near the appliance, will be subjected to radiant heat and could become damaged.
- 4) Typically an outdoor space is not enclosed but, any enclosure in which the appliance is used shall comply with one of the following:

An enclosure with walls on all sides, but at least one permanent opening at ground level and no overhead cover.

Within a partial enclosure that includes an overhead cover and no more that two walls.

Within a partial enclosure that includes an overhead cover and more than two walls, the following shall apply:

- At least 25% of the total wall area is completely open, and
- At least 30% of the remaining wall area is open and unrestricted

30% or more in total of the remaining wall area is open and unrestricted.

***SEE IMPORTANT INSTALLATION NOTES NEXT PAGE**

IMPORTANT INFORMATION FOR OUTDOOR FIREPLACE INSTALLATIONS

- Never insulate around the body of the unit
- Excessive heat retention in the firebox will lead to component failure and fireplace malfunction
- Excessive heat retention will also increase the risk of fire inside the chase
- Heat retention can cause “Oil-canning” and damage the fireplace due to overheating
- Do not build up a wall of any type in front or to the sides of the appliance, higher than the firebox opening. This will create a pressure zone at the firebox and will prevent the unit from venting
- This is an outdoor appliance with a built-in drain. This drain should be installed and connected in all applications as per the instructions in this manual
- Inadequate drainage will cause rust and reduce the life of your appliance, this is not protected by warranty

COMPONENTS IN OUTDOOR APPLIANCES

- Outdoor units use the same consistent, reliable Electronic components used in most Regency “E” units
- Installed correctly, these components will be subjected to far lower temperatures than indoor units, which have been certified as safe from heat etc
- Working gas pressures are as critical in outdoor products as they are in indoor products, even more important in Electronic systems

COMMON MISCONCEPTIONS REGARDING OUTDOOR FIREPLACES

- There is a common misconception that being outdoors, an Outdoor Fireplace will function, regardless of circumstances,
- Outdoor fireplaces require the same amount of ventilation as indoor units, often more
- Outdoor units require adequate ventilation to the atmosphere, which in turn provides ongoing circulatory combustion air
- This type of Appliance Vents.
- All Outdoor Fireplace Products have the same need for Air/Oxygen, and an ability to Vent
- Even though the appliance is outdoors, this doesn't mean it is getting adequate air
- Requirements are not specific to Regency units
- Read and follow critical location guidelines in this manual
-

UNDERSTANDING OUTDOOR APPLIANCE REQUIREMENTS

- Don't overlook the obvious
- Widen your margin for error
- Combustion always requires the same three elements
- Only the quantities and volumes change

IMPORTANT THINGS TO REMEMBER

- Correct Working Gas pressure is critical on “E” units
- Wherever possible avoid locating on a flat wall in a tight corner
- Floor space doesn't count as “open area”
- Install to the manual specs for framing and **do not insulate** unit or enclosure
- Framing enclosure must at least meet minimum dimensional specs as per the installation manual
- Only Regency approved media should be used in the firebox (i.e. stones/glass)
- Be aware of pressure zones due to location (i.e. facing the ocean)
- Open walls and doorways to outside air are beneficial to the performance of an outdoor appliance
- Fixed roof/ceiling open areas count towards the total open area overall requirement
- Screens create 40% or more air restriction
- Screened areas are restrictions and reduce open air space, calculate area based on a **closed** screen
- The biggest problems are created by lack of airflow for the appliance
- Outdoor fireplaces are often built-in systems and incorrect installation can result in high repair costs
- Units must not be modified or altered in any way

ANTICIPATED ISSUES CAUSED BY INCORRECT LOCATION OR INSTALLATION

- Unit shutting down intermittently
- Overheating of components leading to failure
- Lifting flame
- Poor flame package (i.e. all to one side, lazy flame)
- Failure to ignite
- Excess carbon
- Safety issues and concerns created from the byproducts of combustion

OUTDOOR APPLIANCES REQUIRE VENTING

- Outdoor appliances must be installed in: open-air situations with natural ventilation and without stagnant areas
- Any gas leakage and products of combustion need to be rapidly dispersed by wind and natural convection
- Typically outdoor spaces are not enclosed, however, failure to adhere to installation guidelines, may cause the outdoor fireplace to be affected by wind or air pressure inside the enclosure
- **ANY** enclosure in which the appliance is used shall comply with one of the diagrams on the previous page.

OUTDOOR APPLIANCE INSTALLATION SUMMARY

- All walls + overhead cover = 100% total area
- One of four walls or full overhead area must be totally open, plus—one of remaining walls must have a fixed opening
- All outdoor fireplaces/fire tables require total **natural** ventilation of 50% open space

MINIMUM CLEARANCES TO COMBUSTIBLES

The clearances listed below are Minimum distances unless otherwise stated:

A major cause of fires is failure to maintain required clearances (air space) to combustible materials. It is of the greatest importance that this decorative gas appliance be installed only in accordance with these instructions.

Caution Requirements

The top, back and sides of the decorative gas appliance are defined by standoffs. The metal ends of the standoff may **NOT** be recessed into combustible construction.

WARNING

Fire hazard is an extreme risk if these clearances (air space) to combustible materials are not adhered to. It is of greatest importance that this decorative gas appliance be installed only in accordance with these instructions.

Plateau® Series Clearance Requirements

Clearance:	Dimension	Measured From:
A: Back wall	17" (432mm)	Burner to back wall
B: Sidewall	17" (432mm)	Burner to sidewall
C: Ceiling	45" (1143mm)	Burner to Ceiling
D¹: Floor	0" When using supplied leveling legs or optional casters.	
D²: Floor	1" (25mm)	Unit Base to Floor
E: Alcove Width	84" (2134mm)	Wall to Wall (Minimum)
F: Alcove Depth	60" (1524mm)	Front to Back Wall (Maximum)
Notes:	0"	No Hearth Required

INSTALLATION

PLATEAU® SERIES-NG1 SYSTEM DATA

Max. Supply Pressure	14" WC (3.49 kpa)
Min. Supply Pressure	5" WC (1.25 kpa)
Manifold Pressure	3.5" WC (0.87 kpa)
Manifold Pressure -Low	1.6" WC (0.40 kpa)
Orifice Size	#25 DMS
Minimum Input	30,000 Btu/h (8.79 kW)
Maximum Input	50,000 Btu/h (14.65 kW)

PLATEAU® SERIES-LP1 SYSTEM DATA

Max. Supply Pressure	14" WC (3.49 kpa)
Min. Supply Pressure	11" WC (2.73 kpa)
Manifold Pressure	10" WC (2.49 kpa)
Manifold Pressure-Low	6.4" WC (1.59 kpa)
Orifice Size	#45 DMS
Minimum Input	38,000 Btu/h (11.13 kW)
Maximum Input	49,000 Btu/h (14.36 kW)

HIGH ELEVATION

This unit is approved for altitude 0 to 4500 ft. (CAN/CGA 2.17-M91).

GAS LINE INSTALLATION

Since some municipalities have additional local codes it is always best to consult with your local authorities and the CAN/CGA B149 installation code.

For USA installations follow local codes and/or the current National Fuel Gas Code, ANSI Z223.1.

When using copper or flex connectors use only approved fittings. Always provide a union so that gas lines can be easily disconnected for servicing. Flare nuts for copper lines and flex connectors are usually considered to meet this requirement.

NOTE: A shutoff / dante valve should be supplied in or near the unit (or as per local codes) for ease of servicing this appliance.

IMPORTANT: Always check for gas leaks with a soap and water solution or gas leak detector. Do not use open flame for leak testing.

PILOT ADJUSTMENT

Periodically check the pilot flames. Correct flame pattern has two strong blue flames: 1 flowing around the flame sensor and 1 flowing across the burner (it does not have to be touching the burner).

Note: If you have an incorrect flame pattern, contact your Regency® dealer for further instructions.

Incorrect flame pattern will have small, probably yellow flames, not coming into proper contact with the rear burner or flame sensor.

GAS PIPE PRESSURE TESTING

The appliance must be isolated from the gas supply system by closing its individual manual shut-off valve during any pressure testing of the gas supply piping system at test pressures equal to or less than 1/2 psig. (3.45 kPa). Disconnect piping from valve at pressures over 1/2 psig.

The manifold pressure is controlled by a regulator built into the gas control, and should be checked at the pressure test point.

Note: To properly check gas pressure, both inlet and manifold pressures should be checked using the valve pressure ports on the valve.

- 1) Make sure the valve is in the "OFF" position.
- 2) Loosen the "IN" and/or "OUT" pressure tap(s), turning counterclockwise with a 1/8" wide flat screwdriver.
- 3) Attach manometer to "IN" and/or "OUT" pressure tap(s) using a 5/16" ID hose.
- 4) Light the pilot and turn the valve to "ON" position.
- 5) The pressure check should be carried out with the unit burning and the setting should be within the limits specified on the safety label.
- 6) When finished reading manometer, turn off the gas valve, disconnect the hose and tighten the screw (clockwise) with a 1/8" flat screwdriver.
Note: Screw should be snug, but do not over tighten.

886 S.I.T. VALVE DESCRIPTION

- 1) Manual high/low adjustment
- 2) Pilot adjustment
- 3) Outlet Pressure Tap
- 4) Inlet Pressure Tap
- 5) Pilot Outlet
- 6) Main Gas Outlet
- 7) Main Gas Inlet

AERATION ADJUSTMENT

The burner aeration is factory set but may need adjusting due to either the local gas supply or altitude. Open the air shutter for a blue flame or close for a more yellow flame.

Minimum Air Shutter Opening:

Fully Closed	NG
1/2"	LP

Note: Any damage due to carboning resulting from improperly setting the aeration controls is NOT covered under warranty.

WIRING DIAGRAM

This appliance does not require a 120V A.C. supply for operation.

Prolflame System
Configuration:
* 886 ON/OFF Stand Alone
Illustrated Wire Diagram

Important: The AA batteries in the battery pack operate the burner switch. If the batteries become weak they will need to be replaced with quality alkaline batteries. This unit will not operate without AA batteries.

CASTER INSTALLATION

NOTE: Casters to be installed to the bottom of the unit frame before the unit is assembled.
Remove side and end panels - place on a soft clean surface.

1. Install mounting plates onto bottom of Coffee Table or Island Plateau unit.
Use diagrams below to determine orientation of the plates and locations for screws and casters.
Note: there are different caster locations for the Island unit depending on whether the casters are being retrofitted or not.

2. Line up mounting plate at each corner on bottom of unit.
Secure with three self tapping screws in locations shown below.

3. Line up caster with existing nutsert (retrofit) or corresponding hole (see above diagrams) on plate.

4. Retrofit - Thread bolt into nutsert, hand tighten and finish tightening bolt with supplied allen key.

If not a retrofit install, position caster through hole - secure caster with lock washer and lock nut.

Allen key

5. After installation, lock out all 4 casters before assembling unit.

GAS CONNECTION

- 1) Remove end panel (end with the ON/OFF switch). Panels are held in place by magnets. Place panel on a soft clean surface.
- 3) Connect gas line..

- 2) Remove long side panel (left panel if you are facing end with ON/OFF switch) to access the 3/8" fitting to the gas control.

Gas connection @ unit

- 4) Check all gas connections (both valve train & propane tank or NG source) under normal operating pressure, for leaks, with soapy water.

NOTE: If soap bubbles, this would indicate a gas leak.

- 5) Reverse steps 1 & 2.

Average LP Tank Burn Times		
	High	Low
20lb Tank	8 Hrs	10 Hrs
11lb Tank	3.5 Hrs	4 Hrs

INSTALLATION

CONVERSION FROM NG TO LP

**THIS CONVERSION MUST BE DONE BY A QUALIFIED GAS FITTER
IF IN DOUBT DO NOT DO THIS CONVERSION !!**

Each Kit contains one LP Conversion Kit

Conversion Kit # 376-972 Contains:

Qty.	Part #	Description
1	904-655	Burner Orifice #45
1	904-529	5/32" Allen Key
1	910-101	LP pilot orifice
1	918-590	Decal "Converted to LPG"
1	908-528	Red "LP" label
1	911-009	Hi/Lo conversion LP For 886
1	911-089	Propane Hose & Regulator 48 in.
1	919-000	Instruction Sheet

- 4) Remove burner orifice with a 1/2" wrench. Use another wrench to hold on to the elbow behind the orifice. Discard orifice.

- 5) Pull off the pilot cap to expose the pilot orifice. Using a 5/32" allen key, remove pilot orifice and replace with LP pilot orifice.

- 1) Shut off the gas and allow unit to cool to room temperature.

- 2) Remove burner by removing 6 screws in locations shown below. If glass crystals are installed, move the crystals out of the way to reveal screws.

- 3) Slide the burner to the left, away from the pilot assembly and lift out.

Burner orifice

Pilot Cap

- 6) Re-install pilot cap.
7) Reinstall burner assembly.
8) Adjust aeration accordingly.- see aeration adjustment section manual for details.

- 9) Remove end panel (panel w/ switch) from unit.

- 10) Remove two screws to remove valve cover panel.

- 11) Remove Hi/Lo pressure regulator by removing 2 screws as shown below. Reverse steps to install LP pressure regulator.

Hi/Lo pressure regulator

- 12) Attach the label "This unit has been converted to LPG" near or on top of the serial # decal.
13) Replace yellow "NG" label with red "LPG" label.

- 14) Remove NG gas line, if installed - replace with LP regulator and quick connection.

Gas connection @ unit

- 15) Check all gas connections (both valve train & LP tank) under normal operating pressure, for leaks, with soapy water.

NOTE: If soap bubbles, this would indicate a gas leak.

- 16) Install LP tank (see LP tank installation in this manual).
17) Check inlet and outlet pressures.
18) Check operation of flame control.

INSTALLATION

LP TANK INSTALLATION - PTO30CFT ONLY

NOTE: Max. tank size 11lb.

- 1) Remove end panel (opposite end of switch panel).

- 2) Remove long side panel (left panel if facing ON/OFF switch end), to access the 3/8" fitting to the gas control.

- 3) Loosen butterfly bolt to allow LP tank to be seated on the holder.

- 4) Seat tank on tray and tighten butterfly bolt to secure tank to tray.

- 5) Connect the LP regulator quick connect to the tank.

Gas connection
@ tank

- 7) Check all gas connections (both valve train & LP tank) under normal operating pressure, for leaks, with soapy water.

NOTE: If soap bubbles, this would indicate a gas leak.

IMPORTANT:

PTO30 CFT (Coffee table only)

To avoid tank pressure regulator freezing - when using an 11LB LP tank, it is recommended the appliance is run on low (turned down 30%).

WARNING!

When using a LP tank - a minimum 1"(25mm) gap **must be maintained** at all times, between the floor and base of unit.
(Refer to owners manual)

919-031

LP TANK INSTALLATION PTO30IST/PTO30CKT ONLY

NOTE: Max tank size 20lb.

- 1) Remove end panel (opposite end of switch panel).
- 2) Slide out LP gas tank by pulling from handle on slide out tray.

- 3) Undo butterfly bolt to allow LP tank to be seated on the holder.
- 4) Place LP tank onto slide out try and screw in butterfly bolt to secure tank.

Butterfly bolt

- 5) Push tank in from the bottom.
DO NOT PUSH IN FROM THE TOP OF THE TANK.
- 6) Connect the LP regulator quick connect to the tank
- 7) Check all gas connections (both valve train & propane tank) under normal operating pressure, for leaks, with soapy water.

NOTE: If soap bubbles, this would indicate a gas leak.

Gas connection
@ tank

WARNING!

When using a LP tank - a minimum 1"(25mm) gap **must be maintained** at all times, (between the floor and base of unit.
(Refer to owners manual)

919-031

LP TANK REMOVAL

- 1) Remove end panel (opposite end of switch panel).

- 2) Ensure tank is fully closed. Disconnect gas line.
- 3) Slide out LP gas tank by pulling from handle on slide out tray.

NOTE: DO NOT SLIDE OUT TANK BY GRASPING FROM TOP OF TANK.

Slide out handle

- 4) Undo butterfly bolt to release tank.
- 5) Refill tank and reinstall by reversing steps.

Butterfly bolt

INSTALLATION

SWITCH CONNECTION

- 1) Remove the end panel (side with switch assembly mounted on it) from unit.

- 2) Connect 2 wires to the switch - position switch in OFF position.

- 3) Replace panel.

BATTERY INSTALL

- 1) Remove left side (with switch assembly) end panel from unit.
- 2) Slide out battery compartment - located below the DFC panel.

Battery compartment

- 3) Install 4 - AA batteries and reverse steps.

TABLE TOP INSTALLATION - COFFEE TABLE UNIT

Before installation, stainless steel must be handled and cleaned as per instructions noted below:

Stainless Steel Table Top

• Stainless table top must be inspected for scratches and dimples prior to installation. All claims to be recorded at this time. Claims for damage after installation will not receive consideration.

• **To protect the finish during installation and handling** - cotton gloves **MUST** be worn at all times while handling the panels (even when removing protective coating).

• Stainless table top will discolor a little during normal operation. This is normal and should not be considered a defect.

* All hand and finger marks **MUST** be cleaned off with a soft cloth and a stainless steel cleaner. Most stainless steel cleaners leave a film/residue on the surface of the panels. Use an ammonia based cleaner (ie. glass cleaner) to remove this film before applying heat to the unit. **Failure to do this will result in burn stains on table top which you will be unable to remove.** Not protected by product warranty.

NOTE: These instructions apply to both the stainless steel and sunset bronze table tops.

NOTE: Coffee table unit shown below, instructions also apply to built-in burner.

Two brackets need to be installed before installing the Table Top.

1) Remove end panel by pulling off.

2) Install Table Top bracket with 3 screws to unit as shown below.

3) Replace side panel.

4) Repeat Step 1 and 2 on other side.

5) Place Table Top on Unit.

6) Secure table to unit from underside, with 4 screws in locations shown below.

7) Place end caps over pilot and opposite end to complete installation.

End Caps

8) To remove - reverse steps 7-5.

Final Install

TABLE TOP INSTALLATION (FOR ISLAND AND COCKTAIL UNITS ONLY)

Table Top Components.	
8	Tiles
6	Tiles (small inner)
10	Filler Brackets.
1	Table Top Frame
1	Inner frame

NOTE: TAKE CARE WHEN HANDLING AND INSTALLING TILES. TILES TO FREE FLOAT _ DO NOT GLUE TILES TO TABLE TOP.

- 1) Install the end caps (found in the manual pack) at each end and secure with 2 phillips screws found in manual pack.

- 2) Place table top frame on top of unit - finished edge with return face up.

- 3) Line up holes from table top frame with holes on unit - secure with 2 screws at each end - locations shown below

- 4) Place the 10 filler brackets on the table top as shown - before installing tiles.

NOTE: Filler brackets are used to fill the gaps between each tile.

- 5) Install tiles - starting with 4 corner tiles.

Note: Correct position of filler brackets.

- 6) With 4 corner tiles are in place - install center tiles.

- 7) Install - 4 smaller inner tiles. Install 2 end small inner tiles to complete tile installation.

Install small inner end tiles last

- 8) With all tiles installed - install inner frame to finish installation.

GLASS CRYSTAL / BASALT VOLCANIC STONES INSTALLATION

Evenly spread the Glass Crystals and optional Basalt Volcanic Stones over the burner. Ensure the crystals (or stones) do not overlap too much as this will effect the flame pattern.

IMPORTANT NOTE:

Only the supplied approved Glass Crystals and Basalt Volcanic stones are to be used with these fireplaces. Use of any other type of glass crystals or stones can alter the unit's performance, any damage caused by the use of any unapproved glass or stones will not be covered under warranty.

When using Basalt Volcanic Stones DO NOT cover pilot light that lead to pilot flame.

BURNER PACKAGES		
Unit	Glass Crystals Only	*Glass Crystals + Volcanic stones ¹
PTO30	10 lbs	5lb glass + 1 box stones- recommended
PTO60	20lbs	10lb glass + 2 boxes - recommended

NOTE: * Glass Crystals are available in 1lb and 5lb bags.
¹ Glass Crystals to be installed on the burner prior to installing stones.
 Basalt Volcanic Stones are measured by weight not quantity. Each bag contains 15 lbs of stones, however the exact quantity and size vary. Sizes vary between 2" - 3"

1. Start pouring Crystals on one end of the burner.

2. Work Crystals to other end of the Burner. Base and burner tube should not be visible when crystals are spread out.

3. Work Crystals downwards to front edge of top edge of burner.

4. Basalt Volcanic Stones shown spread evenly over the burner and crystal base.

5. Ensure Crystals do not block the front of the pilot hood and flame to light the burner.

NOTE: Correct final glass installation of Crystals as shown in step 2 and 3. The Burner should not be visible when the flame is out.

NOTE: Basalt Volcanic Stones are NOT to be placed anywhere on the Pilot assembly area. Glass Crystals to be installed on the burner prior to installing stones.

OPTIONAL VOLCANIC STONE INSTALLATION

Evenly spread the glass crystals and volcanic stones over the burner. Ensure the stones do not overlap too much as this will effect the flame pattern.

IMPORTANT NOTE:

Only the supplied approved Volcanic Stones are to be used with these fireplaces. Use of any other type of stones can alter the unit's performance, any damage caused by the use of any unapproved glass or stones will not be covered under warranty.

When using Volcanic Stones DO NOT cover burner ports or pilot light that lead to pilot flame. Ensure the stones do not overlap excessively as this will effect the flame pattern.

OUTDOOR VOLCANIC STONE BURNER PACKAGES			
Unit	Volcanic Stones Ivory/Tan	Volcanic Stones Slate/Grey	White Garden Stones
HZO42/HZO42 (AUS)	35 stones w/3lbs glass	35 volcanic stones w/3lbs glass	50 garden stones w/3lbs glass (AUS Only)
PTO30*/Plateau Series	50 stones w/5lbs glass	50 volcanic stones w/5lbs glass	
PTO60	100 stones w/10lbs glass	100 stones w/10lbs glass	
NOTE: * Basalt Volcanic stones are measured by weight not quantity. Each bag contains 15lbs of stones, however the exact quantity and size will vary. Size varies between 2" - 3".			

*Volcanic Stones + Glass Crystals
For the PTO30, PTO60
& Plateau Series only*

*Volcanic Stones Ivory /Tan + Glass Crystals
For the HZO42 & HZO42AUS
only*

*Volcanic Stones Slate /Grey + Glass Crystals
For the HZO42 & HZO42AUS
only*

OPTIONAL LOG SET INSTALLATION

Read the instructions below carefully and refer to the images. If the logs are broken do not use the unit until they are replaced.

Broken logs can interfere with pilot operation.

Improper positioning of the logs may create carbon build-up and can alter the unit's performance which is not covered under warranty.

Log kit # 326-930 contains the following pieces:

Description

- Log A
- Log B
- Log C
- Log D
- Log E
- Log F

Diagram 1

- 1) Install log A as shown below. Orient the log in the same way and in a similar location on the right side of the burner as shown in Diagram 2.

Diagram 2

- 2) Install log D on the burner as shown below. Orient the log in the same way and in a similar location on the right side of the burner as shown in Diagram 3.

Diagram 3

- 3) Install log E on the burner as shown below. Orient log E across log D in the same way and in a similar position as shown in Diagram 4.

Diagram 4

INSTALLATION

- 4) Install log B on the left side of the burner as shown below. Orient log B in the same way and in a similar position as shown in Diagram 5.

Diagram 5

- 5) Install log F on the burner as shown below. Orient log F across log A in the same way and in a similar position as shown in Diagram 6.

Diagram 6

- 6) Install log C on the left side of the burner as shown below. Orient log C in the same way and in a similar position as shown in Diagram 7.

Diagram 7

Final Install

OPTIONAL GLASS SURROUND INSTALLATION

1. Remove metal fasteners from the corner brackets.
2. Assemble the 4 pieces of the glass surround and fasten together with 4 corner top brackets and supplied nylon fasteners as shown below.

3. Using a flat screwdriver, secure 4 top corner brackets with nylon fasteners in each corner, bracket should be flush with the top of glass as shown below.

- 4a. After the 4 top brackets are installed - flip over and place on a soft surface, to install the 4 bottom brackets.

- 4b. Use supplied spacer tool to determine where the bottom bracket should be placed and secured.

5. Secure bottom corner brackets with nylon fasteners in each corner.
6. Flip the glass back over and place on a soft surface. The glass is now right side up. The glass should be raised up 1/2" in bracket as shown below.

7. Place assembled glass surround on table top - ensure glass is centered on the table top. Once in correct position, lift up one end, apply double sided tape that has been cut to size, to the bottom of the brackets. Repeat process on other end. Press down firmly from to secure glass surround in position. Use care not to scratch surfaces.

RISER INSTALLATION (TO CONVERT ISLAND INTO COCKTAIL TABLE)

A riser may be installed at the base of the island table to convert it to a cocktail table.

- 1) If the unit is already assembled - remove the glass surround and table top.
- 2) Remove the two end panels and LP tank - if installed (see LP tank remove section in installation manual). If the unit is connected to a natural gas line, disconnect the gas.

- 3) Remove the end panels and long side panels, place on a clean soft surface.

- 4) Remove the 4 adjustable rubber feet from the bottom of the island unit and transfer to the bottom of the island riser.

- 5) Install the 4 adjustable rubber feet into the bottom of the island riser. Seat all the way in and hand tighten.

- 6) Place the island unit frame on top of the riser - lining up the screw holes and ensure the drain tube is through the island riser drain hole.

- 7) If using unit with a natural gas connection, position riser with gas line knockouts over gas supply connection - unless using the LP tank.

On the riser, remove panels by grasping bottom and lift backwards, place on a soft clean surface.

- 5) Install 8 screws in locations shown below to secure island frame to riser base.

- 5) Reinstall LP tank and reconnect or reconnect NG gas line.
Reinstall panels, table top and glass surround to complete installation.

INSTALLATION

PLATEAU® TABLE COVER INSTALLATIONS

DINING LEAF

For all units:

- 1) Place the dining leaf cover over the burner of the unit when not in use.

GLASS SURROUND COVER

For all units with glass surround installed:

- 1) Place the weather cover over the glass surround when not in use.

WEATHER COVER

For all units:

- 1) Place the weather cover over the entire table - when not in use.

DINING LEAF STORAGE

For PTOCFT only:

- 1) Slide the dining leaf cover into the brackets underneath the the bottom of the unit when not in use.

Leaf slides under the unit

CAUTION:
Never start the unit with the cover on.
Let the unit cool before installing the cover.
Turn off gas supply to unit before installing cover.

OPERATING INSTRUCTIONS

- 1) Read and understand these instructions before operating this appliance.
- 2) Check to see that all wiring is correct and enclosed to prevent possible shock.
- 3) Check to ensure there are no gas leaks.
- 4) Verify log placement. If the pilot cannot be seen when lighting the unit, the logs have been incorrectly positioned.
- 5) The unit should never be turned off, and on again without a minimum of a 60 second wait.

FIRST FIRE

The first fire in your decorative gas appliance is part of the paint curing process. To ensure that the paint is properly cured, it is recommended that you burn your decorative gas appliance for at least one (1) hour the first time you use it.

When first operated, the unit will release an odour caused by the curing of the paint, the burning off of any oils remaining from manufacturing.

The glass surround may require cleaning after the unit has cooled down.

DO NOT ATTEMPT TO CLEAN THE GLASS WHILE IT IS HOT.

LIGHTING PROCEDURE

- 1) Turn on ON/OFF switch.
- 2) After approximately 4 seconds the spark ignition system will spark for 60 seconds to light the main burner.
- 3) The unit will turn on.

Note: The first try for ignition will last approximately 60 seconds. If there is no flame ignition (rectification) the board will stop sparking for approximately 35 seconds. After wait time, the board will start second try for ignition by sparking for approximately 60 seconds. If there is still no positive ignition the board will go into lock out.

The system will need to be reset as follows:

- a) Turn the system off using ON/OFF switch.
- b) After approximately 2 seconds turn on ON/OFF switch.
- c) Unit will repeat step 2.

SHUTDOWN PROCEDURE

- 1) Turn ON/OFF switch.
- 2) If service is to be performed - you must disconnect the battery pack.

COPY OF LIGHTING PLATE INSTRUCTIONS

The lighting plate is located on the underside of the front access panel in the unit.

FOR YOUR SAFETY READ BEFORE LIGHTING	
This appliance must be installed in accordance with local codes, if any; if none, follow the National Fuel Gas Code, ANSI Z223.1/NFPA 54, or Natural Gas and Propane Installation Codes, CSA B149.1.	
<p>WARNING: If you do not follow these instructions exactly, a fire or explosion may result causing property damage, personal injury or loss of life. Improper installation, adjustment, alteration, service or maintenance can cause injury or property damage. Refer to the owner's information manual provided with this appliance. For assistance or additional information consult a qualified installer, service agency or gas supplier.</p> <p>AVERTISSEMENT: Quiconque ne respecte pas à la lettre les instructions dans la présente notice risque de déclencher un incendie ou une explosion entraînant des dommages, des blessures ou la mort.</p> <p>Une installation, d'ajustement, de modification, de service ou d'entretien peut provoquer des blessures ou des dommages matériels. Reportez-vous au manuel du propriétaire de l'information fournie avec cet appareil. Pour obtenir de l'aide ou des informations supplémentaires consulter un installateur qualifié, une agence de service ou fournisseur de gaz.</p>	
<p>A) This appliance is equipped with an ignition device which automatically lights the pilot. Do not try to light the pilot by hand.</p> <p>B) BEFORE OPERATING smell all around the appliance area for gas. Be sure to smell next to the floor because some gas is heavier than air and will settle on the floor.</p> <p style="text-align: center;">WHAT TO DO IF YOU SMELL GAS</p> <ul style="list-style-type: none"> - Do not try to light any appliance. - Do not touch any electric switch, do not use any phone in your building. - Immediately call your gas supplier from a neighbours phone. Follow the gas supplier's instructions. - If you cannot reach your gas supplier, call the fire department. <p>C) Do not use this appliance if any part has been under water. Immediately call a qualified service technician to inspect the appliance and replace any part of the control system and any gas control which has been underwater.</p> <p>A) Cet appareil est muni d'un dispositif d'allumage qui allume automatiquement la veilleuse. Ne tentez pas d'allumer la veilleuse manuellement.</p> <p>B) AVANT DE FAIRE FONCTIONNER, reniflez tout autour de l'appareil pour détecter une odeur de gaz. Reniflez près du plancher, car certains gaz sont plus lourds que l'air et peuvent s'accumuler au niveau du sol.</p> <p style="text-align: center;">QUE FAIRE SI VOUS SENTEZ UNE ODEUR DE GAZ :</p> <ul style="list-style-type: none"> • Ne pas tenter d'allumer d'appareil • Ne touchez à aucun interrupteur; ne pas vous servir des téléphones se trouvant dans le bâtiment. • Appelez immédiatement votre fournisseur de gaz depuis un voisin. Suivez les instructions du fournisseur. • Si vous ne pouvez rejoindre le fournisseur, appelez le service des incendies <p>C) N'utilisez pas cet appareil s'il a été plongé dans l'eau, même partiellement. Faites inspecter l'appareil par un technicien qualifié et remplacez toute partie du système de contrôle et toute commande qui ont été plongés dans l'eau.</p>	
<p>CAUTION: Hot while in operation. Do not touch. Severe Burns may result. Due to high surface temperatures keep children, clothing and furniture, gasoline and other liquids having flammable vapors away. Keep burner and control compartment clean. See installation and operating instructions accompanying appliance.</p>	
LIGHTING INSTRUCTIONS	
<p>1) Turn on ON/OFF switch</p> <p>2) After approximately 4 seconds the spark ignition system will spark for 60 seconds to light the main burner.</p> <p>3) The unit will turn on.</p> <p>Note: The first attempt to ignition will last approximately 60 seconds. If there is no flame ignition (rectification) the board will stop sparking for approximately 35 seconds. After this wait time, the board will start a second try for ignition by sparking for approximately 60 seconds. If there is still no positive ignition after the second attempt the board will go into lock out.</p> <p>The system will need to be reset as follows (after going into lock out mode):</p> <ol style="list-style-type: none"> a) Wait 5 minutes - turn the system off using ON/OFF switch. b) After approximately 2 seconds turn on ON/OFF switch or press ON/OFF button if using optional remote. c) Unit will repeat step 2. <p>1) Appuyez le bouton ON / OFF</p> <p>2) Attendre 4 secondes. Le système d'allumage produira des étincelles pendant 60 secondes afin d'amorcer le brûleur principal.</p> <p>3) Les flammes s'allumeront.</p> <p>Remarque : Au premier allumage, le système tente d'allumer les flammes pendant 60 secondes. Si l'essai est infructueux, le système fait une pause de 35 secondes. C'est ce qu'on appelle l'étape de rectification. Ce délai écoulé, le système tente à nouveau d'allumer les flammes en produisant des étincelles pendant 60 secondes. Si les flammes ne s'allument toujours pas, le système se met en mode verrouillage.</p> <p>Il faut alors le réinitialiser en suivant les étapes ci-dessous (pour le déverrouiller) :</p> <ol style="list-style-type: none"> a) Attendre 5 minutes et éteindre l'appareil en réglant l'interrupteur à la position « OFF »; b) Attendre 2 secondes et rallumer le système à l'aide de l'interrupteur ou de la télécommande. c) L'unité répétera l'étape 2. 	
TO TURN OFF GAS APPLIANCE	
<p>1) Turn off ON/OFF switch</p> <p>2) If service is to be performed - you must disconnect power to the unit, from the battery pack, refer to manual.</p> <p>1) Appuyez sur le bouton ON / OFF</p> <p>2) Si le service est effectuée, vous devez débrancher l'appareil, du bloc-piles, voir le manuel d'instruction pour plus de détails.</p>	
<div style="border: 2px solid red; padding: 5px; display: inline-block; color: red; font-weight: bold;">DO NOT REMOVE THIS INSTRUCTION PLATE</div>	
918-628b	

MAINTENANCE INSTRUCTIONS

- 1) Always turn off the gas valve and unplug the batteries before cleaning. For relighting, refer to lighting instructions. Keep the burner and control compartment clean by brushing and vacuuming at least once a year. When cleaning the logs, use a soft clean paint brush as the logs are fragile and easily damaged.
- 2) Clean off leaves etc. before burning.
- 3) Clean appliance with a damp cloth (never when unit is hot). Never use an abrasive cleaner. The glass should be cleaned with a outdoor decorative gas appliance glass cleaner.
- 4) Hand and finger marks should be cleaned off with a soft cloth and a stainless steel cleaner. Most stainless steel cleaners leave a film/residue on the surface of the panels. Use an ammonia based cleaner (ie. glass cleaner) to remove this film before applying heat to the unit. Failure to do this will result in burn stains on panels which you will be unable to remove.
- 5) Make a periodic check of burner for proper position and condition. Visually check the flame of the burner periodically, making sure the flames are steady; not lifting or floating. If there is a problem, call a qualified service person.
- 6) The appliance must be inspected before use, and at least annually, by a qualified field service person, to ensure that the flow of combustion and ventilation air is not obstructed.
- 7) Do not use this appliance if the valve and/or electronic components have been or are submerged under water. Immediately call a qualified service technician to inspect the appliance and to replace any part of the control system and any gas control which has been under water. This is not covered under the terms of the warranty policy.
- 8) Verify operation after servicing.

SWITCH REPLACEMENT

- 1) Remove the end panel (side with switch assembly mounted on it) from unit.

- 2) Remove 2 wire from the switch.

- 3) Remove 2 screws from switch cover to release switch.

- 4) Replace switch and reverse steps.

VALVE ASSEMBLY REPLACEMENT

Turn the unit off and allow to cool to room temperature.

1) Remove burner by removing 6 screws in locations shown below.

2) Slide the burner to the left and lift out.

3) Turn off gas supply and remove flex connection at valve.

4) Remove orange EV1 wire connected to the gas valve.

5) Remove green EV2 wire connected to the gas valve.

6) Remove HI/LO extension knob.

7) Remove 10 screws in locations shown below to remove valve tray.

8) Manuover valve assembly up and out.

9) Replace gasket if required.

10) Replace with new valve assembly.

11) Install Hi/Lo extension knob removed in step 6.

12) Reverse step 6-1 to reinstall.

DIGITAL FIREPLACE CONTROL REPLACEMENT

- 1) Remove left side (with switch assembly) end panel from unit.

- 2) Remove two screws to remove valve cover panel in locations shown below.

- 3) Remove two screws to swing down DFC box.

- 4) Disconnect spark electrode wire.
Disconnect flame sensor (red)
Disconnect ground.
Disconnect wire harness.

Flame sensor Spark Electrode Ground Wire harness

- 5) Remove 4 screws to remove DFC box.
- 6) Replace with new DFC box and reverse steps 5-1.

BATTERY REPLACEMENT

- 1) Remove left side (with switch assembly) end panel from unit.
- 2) Pull down battery compartment - located below the DFC panel.

Battery compartment
Battery pack

- 3) Replace 4 - AA batteries and reverse steps.

Regency® Fireplace Products are designed with reliability and simplicity in mind. In addition, our internal Quality Assurance Team carefully inspects each unit thoroughly before it leaves our facility. FPI Fireplace Products International Ltd. is pleased to extend this limited warranty to the original purchaser of a Regency® Product. This warranty is not transferable.

Limited Warranty:

The gas valve, burner tube, pilot assembly, flame sensor, electrode, control modules, switches and wiring for battery compartment are all covered for (2) two years on parts and (1) one year on subsidized* labor only against defect in manufacture, from date of purchase.

Ceramic logs, volcanic stones, glass crystals, and tempered glass wind shield carry a (1) one year warranty against manufacturing defect, on parts, with no labor allowance, from date of purchase.

Special finishes such as stainless steel components are not covered against environmental damage including corrosion, misuse, cleaning or handling issues that cause discoloration. To receive consideration any damage claim against stainless steel components must be submitted at the time of installation. Damage from abrasive cleaners and discoloration to stainless components caused by heat, are not covered under warranty. Damage reported after installation will not be covered.

Repair/replacement parts purchased by the consumer from FPI after the original coverage has expired on the unit will carry a 90 day warranty, valid only with a receipt. Any item shown to be defective will be repaired or replaced at our discretion. No labor coverage is included with these parts.

Conditions:

Any part or parts of this unit which in our judgement show evidence of such defects will be repaired or replaced at FPI's option, through an accredited distributor or agent provided that the defective part be returned to the distributor or agent Transportation Prepaid, if requested.

It is the general practice of FPI to charge for larger, higher priced replacement parts and issue credit once the replaced component has been returned to FPI and evaluated for manufacturer defect.

The authorized selling dealer is responsible for all in-field service work carried out on your Regency® product. FPI will not be liable for results or costs of workmanship from unauthorized service persons or dealers.

At all times FPI reserves the right to inspect product in the field which is claimed to be defective.

All claims must be submitted to FPI by authorized selling dealers. It is essential that all submitted claims provide all of the necessary information including customer name, purchase date, serial #, type of unit, problem, and part or parts requested, without this information the warranty will be invalid.

Exclusions:

Batteries are not covered under warranty policy.

At no time will FPI be liable for any consequential damages which exceed the purchase price of the unit. FPI has no obligation to enhance or modify any unit once manufactured. ie. as products evolve, field modifications or upgrades will not be performed.

FPI will not be liable for travel costs for service work.

Installation and environmental problems are not the responsibility of the manufacturer and therefore are not covered under the terms of this warranty policy.

Any unit which shows signs of neglect or misuse is not covered under the terms of this warranty policy.

The warranty will not extend to any part which has been tampered with or altered in any way, or in our judgment has been subject to misuse, improper installation, negligence or problems caused by environmental or geographical conditions, inadequate ventilation.

Freight damage to stoves and replacement parts is not covered by warranty and is subject to a claim against the freight carrier by the dealer.

FPI will not be liable for acts of God, or acts of terrorism, which cause malfunction of the appliance.

Malfunction | damage of this appliance due to mother nature (wind, rain, snow, etc.) is not covered under the terms of the warranty policy.

Performance problems due to operator error will not be covered by this warranty policy.

Products made or provided by other manufacturers and used in conjunction with the operation of this appliance without prior authorization from FPI, may create a danger and nullify your warranty on this product.

Any alteration to the unit which causes sooting or carboning that results in damage to the interior / exterior facia is not the responsibility of FPI.

* Subsidy according to job scale as predetermined by FPI.
