Manual

DVi34L GAS INBUILT

Models: DVi34LNG
DVi34LLPG
DVi34LULPG

PLEASE KEEP THESE INSTRUCTIONS FOR FUTURE REFERENCE

LISTINGS AND CODE APPROVALS

These gas appliances have been tested in accordance with AS/NZS 5263.0 & AS/NZS 5263.1.3 and have been certified by the Australian Gas Association for installation and operation as described in these Installation and Operating Instructions. Must be installed as per AS/NZS5601.

Your unit should be serviced annually by an authorised service person.

WARNING: Improper installation, adjustment, alteration, service or maintenance can cause injury or property damage. Refer to this manual. For assistance or additional information consult an authorised installer, service agency or the gas supplier.	FOR YOUR SAFETY What to do if you smell gas: <ul style="list-style-type: none">● Do not try to light any appliance● Do not touch any electrical switch: do not use any phone in your building.● Immediately call your gas supplier from a neighbour's phone. Follow the gas supplier's instructions.● If you cannot reach your gas supplier, call the fire department.
FOR YOUR SAFETY Do not store or use gasoline or other flammable vapours and liquids in the vicinity of this or any other appliance.	
Installation and service must be performed by an authorised installer, service agency or the gas supplier.	

REGENCY GAS INBUILT FIREPLACE

TO THE NEW OWNER

Congratulations! You are the owner of a state-of-the-art Gas Inbuilt Fireplace by FPI. The Regency Gas Fireplace Series of appliances has been designed to provide you with all the warmth and charm of a fireplace, at the flick of a switch. The model DVi34L of this series has been approved by Australian Gas Association for both safety and efficiency. As it also bears our own mark, it promises to provide you with economy, comfort and security for many trouble free years to follow. Please take a moment now to acquaint yourself with these instructions and the many features of your Regency Fireplace.

PAIRING YOUR REMOTE CONTROL

The control box will only learn the remote ID codes during the first 30 seconds after power is applied. After the first 30 seconds, the control box will ignore this special command.

The remote control handset has a set of unique ID codes that are pre-programmed into its memory. This set of ID codes helps differentiate one remote control handset from another; only the control box with a matching ID code will respond to the appropriate remote control handset.

To match the control box, follow these steps:

1. Ensure the remote is switched off.
2. Remove the main power to the control box.
3. Reconnect the main power to the control box.
4. Press and hold the PROG and FAN buttons simultaneously. The temperature display will show the letters "LC", indicating the ID codes were transmitted, then revert to the normal off mode display.
5. Release the PROG and FAN buttons.

The control box will only learn the remote ID codes during the first 30 seconds after power is applied and will ignore this special command from the remote afterward.

Note: The pairing process can be carried out by anyone.

Note: Please visit www.regency-fire.com.au to see the pairing video.

Fan Operation

The fan must be on at all times while the unit is in operation. This model offers a two-speed fan.

WARNING

DO NOT turn your fireplace on via any means or allow to be turned on unless you have conducted a thorough inspection of the area surrounding the fireplace immediately prior to its use, and you have satisfied yourself that there are no materials or other items in proximity to the fireplace which could present a fire risk.

DO NOT turn your fireplace on via any means or allow to be turned on if there are any unsupervised children, infirm or pets in the area surrounding the fireplace.

DO NOT use this fireplace, unless you have read this Manual, and strictly adhere to the user requirements and warnings set out in this Manual.

RELEASE

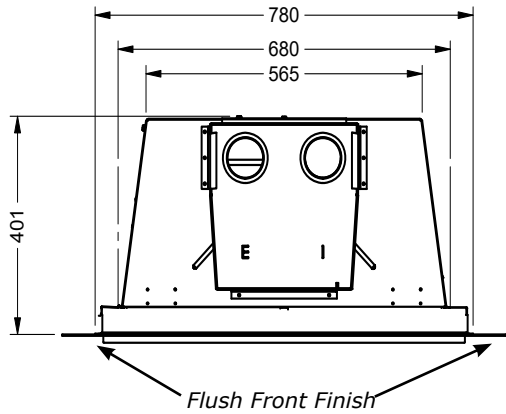

Without limiting any other acknowledgement, release or indemnity given by you, or limitation of liability, in favour of Fireplace Products Pty Ltd ("Company"), you irrevocably and unconditionally acknowledge and agree that failure to comply with, or strictly adhere to, the requirements and warnings set out in this Manual ("User Requirements") may result in:

1. damage to the fireplace;
2. damage to property;
3. a house fire;
4. severe burns or other personal injury; and/or
5. death.

Subject to any remedy, guarantee, term, condition, warranty, undertaking, inducement or representation, implied or imposed by any legislation which cannot lawfully be excluded or limited, and to the maximum extent permitted by law:

1. the Company will not be liable for any damage, personal injury or death arising out of or in connection with your failure to comply with any User Requirement; and
2. you release the Company from all claims, actions, proceedings, liabilities, losses and damages in relation to death, any personal injury or property damage arising out of or in connection with your failure to comply with any User Requirement.

To be installed by an authorised person in accordance with installation instructions provided with the appliance.

DO NOT OPERATE THIS APPLIANCE BEFORE READING THE INSTRUCTIONS BOOKLET.

DO NOT PLACE ARTICLES ON OR AGAINST THIS APPLIANCE

DO NOT STORE CHEMICALS OR FLAMMABLE MATERIALS NEAR THIS APPLIANCE.

DO NOT OPERATE WITH PANELS, COVERS OR GUARDS REMOVED FROM THIS APPLIANCE.

908-602c

THE GUARD IS FITTED TO THIS APPLIANCE TO REDUCE THE RISK OF FIRE OR INJURY FROM BURNS AND NO PART OF IT SHOULD BE PERMANENTLY REMOVED.

FOR PROTECTION OF YOUNG CHILDREN OR THE INFIRM, A SECONDARY GUARD IS REQUIRED.

IMPORTANT MESSAGE

The Regency Gas Inbuilt must be installed in accordance with these instructions. Carefully read all the instructions in this manual first.

Note: Failure to follow these instructions could cause a malfunction of the heater which could result in death, serious bodily injury, and/or property damage. Failure to follow these instructions may also void your fire insurance and/or warranty.

FOR YOUR SAFETY

This appliance requires air for proper combustion. Always provide adequate combustion and ventilation air. Follow instructions and information in the current AS/NZS5601 or local codes. Consult the "authority having jurisdiction" to determine the need for a permit prior to starting the installation.

MATERIALS REQUIRED

A 240 Volt AC power cord is hooked up to the unit. Plug 3 wire cord into a suitable receptacle. Do not cut the ground terminal off under any circumstances.

When connected with 240 volts, the appliance must be electrically grounded in accordance with local codes.

This unit is polarity sensitive and will not operate if polarity is incorrect.

WARNING:

Suitable for installation into a masonry fireplace only.

BEFORE YOU START

Installation is to be carried out ONLY by an authorised person.

- 1) The appliance shall be installed in accordance with the manufacturer's installation instructions, local gas fitting regulations, municipal building codes, water supply regulations, electrical wiring regulations, with AS/NZS5601.
- 2) **Installation and repair should be done ONLY by an authorised person.**
- 3) The appliance should be inspected before use and at least annually by an authorised service person. More frequent cleaning may be required due to excessive lint from carpeting, bedding material, etc. It is imperative that control compartments, burners and circulating air passageways of the appliance be kept clean and free from excessive lint from carpeting.
- 4) See general construction and assembly instructions. This appliance may only be installed in a flued, non-combustible fireplace. The appliance and flue should be enclosed when installed or passing through a living area, where children may come in contact with it.
- 5) Always connect this space heater to a chimney and flue to the outside of the building envelope. Never flue to another room. Make sure that the flue is properly sized and is of adequate height to provide the proper draft.
- 6) Inspect the flueing system annually for blockage and any signs of deterioration.
- 7) Any safety glass removed for servicing must be replaced prior to operating the appliance.
- 8) To prevent injury, do not allow anyone who is unfamiliar with the operation to use the fireplace.

PACKAGING: The unit and its contents are packaged to prevent damage during transport. After unboxing, remove the cardboard spacers and plastic wrap and recycle or dispose of them properly. Carefully remove the logs from inside the unit before commissioning it; unwrap each log and set aside. Refer to subsequent instructions on proper set up and safety check before commissioning the unit.

INSTALLATION CHECKLIST

Before installing vent system ensure that the damper plate is open and secure to prevent the damper plate from falling down and crushing the liner.

The FPI Gas Inbuilt is installed as listed.

- 1) Check all clearances to combustibles, (Refer to sections "Minimum Fireplace Dimensions and Clearances to Combustibles")
- 2) Make the gas connection. (Refer to section "Gas Connection")
- 3) Install the 3" (76.2mm) flue liner to the sliding connector plate. (Refer to section "Flue Liner Installation.")
- 4) Slide the unit half way into the fireplace.
- 5) Pull the vent connector plate through the tapered brackets and fasten to the front plate. Refer to section "Flue Liner Installation.")
- 6) Slide the unit fully into the fireplace.
- 7) Test gas pressure (Refer to section "Gas Pipe Pressure Testing"). Check aeration system (Refer to section "Gas Insert Aeration System").
- 8) Install standard and optional features. Refer to the following sections:
 - a. Log Set
 - b. Faceplate & Door Trim
 - c. Inner Stainless Panels
- 9) **Final check:** Before leaving this unit with the customer, the installer must ensure that the appliance is firing correctly. This includes:
 - a) Clocking the appliance to ensure the correct firing rate.
 - b) Adjusting the primary air and restrictor settings, if required, to ensure that the flame does not carbon.

**NOTE:
TO BE INSTALLED ON A
NON- COMBUSTIBLE FLOOR.**

INSTALLATION

MINIMUM FIREPLACE OPENING

The minimum fireplace openings for the Regency DVi34L gas space heater are shown below:

	Lintel Depth (mm) -A-	Height (mm) -B-	Width Front (mm) -C-	Depth (mm) -D-	Width-Back (mm) -E-
Fascia flush (no spacer)	275	595	780	406	600
Fascia with spacer	223	595	680	353	600

INSTALLATION

CLEARANCES TO COMBUSTIBLES

Minimum Clearances to Combustibles

	From Unit	
Sides	A	255 mm
Ceiling	B	1205 mm
Mantel	C	330 mm
Max. Mantle Depth	E	305 mm (see Dia. 2)
Min. Alcove Width	F	1220 mm
Max. Alcove Depth	G	915 mm

*No hearth required.

Mantel Clearances

Note: A non-combustible mantel may be installed at a lower height if the framing is made of metal studs covered with a non-combustible board.

GAS CONNECTION

GAS CONNECTION WARNING:
Only persons licensed to work with gas piping may make the necessary gas connections to this appliance.

- 1) If the appliance is to be installed into an existing chimney system, thoroughly clean the masonry fireplace.
- 2) The appliance is provided with an opening on the right hand side of the control compartment. The 9.5 mm flexible gas hose provided needs to be brought in from behind this opening. Ensure all gas connections are tight.
- 3) Locate the center point where the vent will pass through the chimney above the appliance. Move the appliance into the exact location where it is to be installed. Ensure that the Insert is level.

FLUEING

WARNING
DO NOT USE AN UNLINED MASONRY CHIMNEY AS THE FLUE FOR THIS APPLIANCE. THE APPLIANCE MUST NOT CONNECT TO A CHIMNEY FLUE SERVING A SEPARATE SOLID FUEL BURNING APPLIANCE AND MUST BE TERMINATED TO THE OUTDOORS.

This appliance is designed to be attached to two 76 mm co-linear aluminium flex running the full length of the chimney. The flue length must be a minimum length of 2.44 m and a maximum of 10.7 m. See chart below for minimum distances from roof. Periodically check that the vent is unrestricted.

Masonry chimneys may take various contours which the flexible liner will accommodate. However, **keep the flexible liner as straight as possible**, avoid unnecessary bending.

The Air Intake pipe must be attached to the inlet air collar of the termination cap.

Part #	Description
948-640	76 mm Flex - 12.2 m
946-549	Co-linear DV Vertical Termination Cap

Note: When installing the flueing, identify the flues. Mark one exhaust and one intake as indicated on the top of the unit.

Alternate Termination Cap/Adaptor

Part #	Description
46DVA-GK	Simpson Duraavent Adaptor
46DVA-VCH	Simpson Vertical High Wind Cap

INSTALLATION

The Air Intake pipe must be attached to the inlet air collar of the termination cap.

Be careful not to damage thermal insulation when sliding on vent connector plate. This could cause blockage.

- 9) Connect the 2nd liner to the exhaust collar marked with an "E", seal connection with high temperature silicone. Secure with gear clamp.

- 4) Seal and or check the pilot outlet (# 8)
- 5) The pressure check should be carried out with the unit burning and the setting should be within the limits specified on the safety label.
- 6) When finished reading manometer, turn off the gas valve, disconnect the hose and tighten the screw (clockwise) with a small, flat screwdriver. *Screw should be snug, but do not over tighten.*

FLUE LINER INSTALLATION

- 1) Cut the flex liner as required.
- 2) **Mark the end of one liner to indicate Inlet.**
- 3) Connect the other end of the above liner to the inlet side of the termination adaptor, seal connection with high temperature silicone. Secure with gear clamp.
- 4) Connect the 2nd liner to the exhaust side of the adaptor, seal connection with high temperature silicone. Secure with gear clamp.

- 5) Install flashing.
- 6) Insert both liners into chimney, passing through the damper opening.
- 7) Install termination cap.
- 8) Connect the **marked end** of the liner to the inlet collar of the vent connector plate marked with an "I", seal connection with high temperature silicone. Secure with gear clamp.

Install to AS5601 (Australia) / NZS 5262 (New Zealand)

S.I.T. Valve Description

- 1) On-Off Solenoid Valve EV1
- 2) On-Off Solenoid Valve EV2
- 3) Inlet Pressure Test Point
- 4) Outlet Pressure Test Point
- 5) Connection for Pressure Regulator/ Combustion Chamber Compensation
- 6) Pressure Regulator for Minimum and Maximum Outlet Pressure
- 7) Gas Outlet Pressure Electric Modulator
- 8) Pilot Outlet
- 9) Main Gas Outlet
- 10) Side Outlet

GAS PIPE PRESSURE TESTING

The appliance must be isolated from the gas supply piping system by closing its individual manual shut-off valve during any pressure testing of the gas supply piping system at test pressures equal to or less than 3.45 kPa. Disconnect piping from valve at pressures over 3.45 kPa.

The manifold pressure is controlled by a regulator built into the gas control, and should be checked at the pressure test point.

Note: To properly check gas pressure, both inlet and manifold pressures should be checked using the valve pressure ports on the valve.

- 1) Make sure the valve is in the "OFF" position.
- 2) Loosen the "IN" (# 3) and/or "OUT" (# 4) pressure tap(s), turning counterclockwise with a small, wide, flat screwdriver.
- 3) Attach manometer to "IN" and/or "OUT" pressure tap(s) using an 8 mm ID hose.

INSTALLATION IN MASONRY OR ZERO CLEARANCE CHIMNEY

- 1) Measure and record dimensions to determine total Flex Liner length requirements (see instructions below for details).
- 2) Carefully feed the liner down the chimney (masonry or zero clearance) and out through the damper. One person should feed the liner through the chimney, and another person should pull the liner from the bottom.
- 3) After carefully feeding the Flex Liner down the chimney to the bottom, form and angle to line up the Flex Liner with the vent opening on the appliance.

Important: Do not let the Flex Liner sag below the level at which it will connect to the appliance or connector. This could allow hot gas to become trapped and potentially become a fire hazard. The Flex Liner path should always be sloped up toward the Termination Cap.

- 4) Temporarily secure the Flex Liner at the top of the chimney. Be sure to leave 76 mm of flex above the existing chimney to allow for connection to the Termination Kit (Baseplate and Adaptor).

- 5) Repeat Steps 1-4 for second length of Flex Liner.
- 6) At the top of the chimney, slide the Baseplate over the two ends of the Flex Liner and secure it to the surrounding masonry using masonry anchor bolts. Before installing the baseplate, run a bead of non-hardening seal and between the Baseplate and the masonry to prevent moisture from entering the chimney.

Note: Verify that there is sufficient room to mount the Baseplate on to the masonry. You must have a level surface in order to install the Baseplate properly.

- 7) Attach the Flex Liner ends at the top of the chimney to the Co-Linear to Co-Axial Adaptor. Use four sheet metal screws to connect each Flex Liner run to the Adaptor.
- 8) Twist lock the Vertical Termination Cap to the Adaptor.

Note: If you are planning to extend the height of the chimney using Direct Vent GS Pipe, please refer to the Direct Vent Installation Instructions for information concerning the proper procedure and restrictions of Direct Vent Pipe.

Also, consult the appliance manufacturer for any height restrictions of the chimney.

- 9) Connect the Co-Linear Flex to the two outlets on the top of the appliance using four sheet metal screws each. See the appliance manufacturer's instructions for details. Make sure the Flex Liners do not sag behind the appliance. Finally, move the appliance into its appropriate place. Mount the Adaptor to the Baseplate using sheet metal screws.

INSTALLATION

System Data			
DVi34L			
DVi34LNG: For 0 to 610 meters altitude DVi34LLPG: For 0 to 610 meters altitude DVi34LULPG: For 0 to 610 meters altitude			
Burner Inlet Orifice Sizes:			
Burner	NG #37	Propane #52	ULPG #53
Max. Input			
NG	31.7 MJ/h		
Propane	30.6 MJ/h		
ULPG	26.4 MJ/h		
Min. Input			
NG	21.1 MJ/h		
Propane	25.1 MJ/h		
ULPG	20.9 MJ/h		
Supply Pressure			
NG	1.13 kPa		
Propane	2.75 kPa		
ULPG	2.75 kPa		
Manifold Pressure			
	HIGH	LOW	
NG	0.87 kPa	0.4 kPa	
Propane	2.51 kPa	1.6 kPa	
ULPG	2.51 kPa	1.6 kPa	
Electrical: 240 V. 50Hz. Circulation: High/Off/LO speed fan, 150/89 CFM. Log Set: Ceramic fiber, 7 per set.			
Aeration Setting			
NG	13 mm open		
Propane	13 mm open		
ULPG	13 mm open		

AERATION SETTINGS

The burner aeration is factory set but may need adjusting due to either the local gas supply, air supply or altitude. This adjustment is performed by the installer. (Close the aeration for a more yellow flame, or open it to make the flame bluer).

NG: 13mm open
Propane: 13mm open
ULPG: 13mm open

Note: Any damage due to carboning resulting from improperly setting the aeration and restrictor setting controls is NOT covered under warranty.

CONVERSION KIT #337-968 FROM NG TO PROPANE/ULPG MODEL

Conversion Kit Contains:

Qty.	Part #	Description
1	904-390	LP Burner Orifice #52
1	904-345	ULPG Buner Orifice #53
1	918-728	Orange "PROPANE" Label
1	918-272	Label "Converted to LPG"
1	910-037	Propane Pilot Injector
1	920-237	Instruction Sheet

- 1) Shut off the gas supply and unplug the power cord.
- 2) Remove the glass door, logs and lava rock.
- 3) Remove the rear log tray by removing the 2 screws. (Log tray must be rotated to clear the burner.)
- 4) Remove the grate.
- 5) Remove the burner and ensure the aeration setting is 13 mm open.
- 6) Remove burner orifice with a 1/2" wrench and discard. Use a wrench to hold on to the elbow behind the orifice.

Burner Orifice

- 7) Reinstall new burner orifice Propane stamped #52 OR ULPG stamped #53 and tighten
- 8) Apply the conversion label "This unit has been converted to ULPG" over top of the serial number decal.

Note: Aeration settings do not need to be adjusted.

- 9) Pull out the pilot hood by hand.

- 10) Remove the pilot orifice with the allen key.

- 11) Put in the new pilot orifice with the allen key. Then put back the pilot hood.

- 12) Replace the black "NATURAL GAS" label with either orange "PROPANE" label OR red "UNIVERSAL LPG" label.

- 13) Carefully pull out the control box.

NOTE: The control box is held in place with velcro.

- 14) Remove the heat shield from the control box by removing the 2 screws.

- 15) Remove the control box cover by undoing the 3 screws. Manoeuvre through antenna.

- 16) Remove the jumper using a plier.

- 17) Reverse steps 15, 14, 13, 6, 5, 4, 3 & 2.

INSTALLATION

18) Turn on gas supply and plug in power cord.

19) Adjusting the Outlet Pressure

All the adjustments must be carried out in the following order:

Remove the modulator plastic cap (A) using needle nose pliers.

Maximum pressure: Turn the unit ON to its highest input rating. Screw in the nut (B) to increase the outlet pressure and screw it out to decrease it. Use a 10 mm wrench.

NOTE: The outlet pressure must be set to maximum 2.51 kPa.

Minimum pressure: Remove one of the cables connected to the electric modulator. While holding the nut (B) with a wrench, screw in the screw (C) to increase the pressure and screw it out to decrease it. Use a screwdriver 6 x 1 blade.

NOTE: The outlet pressure must be set to minimum 1.6 kPa.

Cable

Electric Modulator

After carrying out all adjustments, block the setting screws with paint, taking care not to obstruct the breather orifice of the pressure.

Put back the modulator plastic cap.

WARNING: To ensure the correct operation of the modulator it is necessary that the plastic cap (A) is returned to its original location.

20) Turn on gas supply and plug in power cord.

21) At the end of all setting and adjustment operations, check electrical installation and gas leaks.

22) Check operation of flame control.

23) Check for proper flame appearance and glow on logs.

Installer Notice:
These instructions must be left with the appliance.

LOG SET INSTALLATION

Read the instructions below carefully and refer to the diagrams. If logs are broken do not use the unit until they are replaced. Broken logs can interfere with the pilot operation.

The gas log kit (part # 402-935) contains the following:

- a) 02-43 Rear Log
- b) 02-45 Front Right Log
- c) 02-56 Middle Left Log
- d) 02-46 Left Top Log
- e) 02-47 Center Log
- f) 02-48 Middle Right Log
- g) 02-44 Front Left Log
- h) 902-154 Embers
- i) 902-153 Rockwool
- j) 902-179/P Vermiculite
- k) 946-669 Platinum Embers
(supplied with packaged manual)

The "02" refer numbers (i.e. 02-43) are molded into the rear of each log.

Note: Install Optional Brick Panels prior to installing logs.

- 1) Carefully remove the logs from the box and unwrap them. The logs are fragile, handle with care - **do not force into position.**
- 2) Sprinkle the vermiculite around the firebox base. Take some of the embers (approx. 1/3 of the bag) and sprinkle over the vermiculite.

- 3) Place Rear Log A)02-43 on the two pins on the rear log support.

- 4) Place Front Right Log B)02-45 on the two pins as shown.

INSTALLATION

- 5) Place the Middle Left Log C)02-56 on the two pins as shown.

Logs A)02-43, C)02-56, and B)02-45 in position

- 7) Place the notch in Center Log E)02-47 over Log B)02-45 and across the cutout on Log A)02-43.

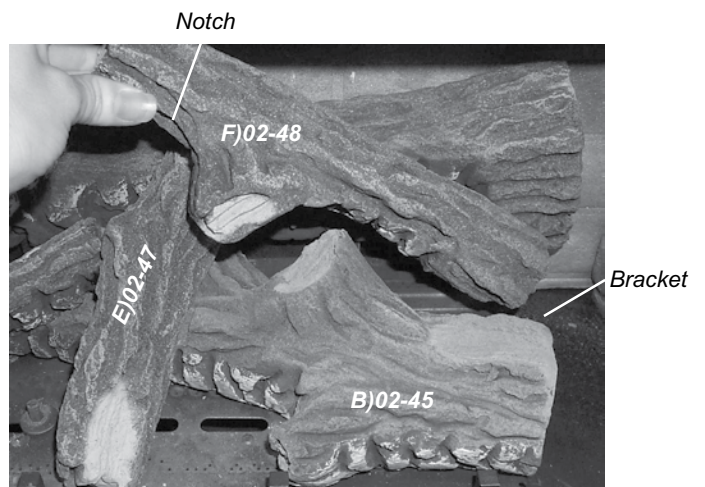

Logs D)02-46 and E)02-47 in position.

- 6) Place the Left Top Log D)02-46 on the pin on Log C)02-56 and on top of the cutout on Log A)02-43.

- 8) Position notch in Front Right Log F)02-48 on Log E)02-47 and push the bottom right edge against the bracket on the burner tray and the front edge of the rear burner.

INSTALLATION

The bottom right edge of Log F)02-48 must sit snugly against the bracket and the front edge of the rear burner.

- 9) Place Front Left Log G)02-44 onto the 2 front pins as shown.

- 10) Place the embers and Rockwool on the exposed front burner tray.

- 11) Separate platinum embers and place on and around the embers and rockwool on the burner tray. Avoid stacking platinum embers.

- 12) Test fire to ensure proper light off (make sure flame flows smoothly from one end of burner to the other. If there is any flame hesitation, check that area for any blockage of the burner port.

The "02" refer numbers (i.e. 02-43) are molded into the rear of each log.

INSTALLATION

GLASS DOOR INSTALLATION

STANDARD FLUSH DOOR

The **standard flush door** comes with a black frame. To install the frame and glass door, simply hook the top door flange onto the top of the unit and swing the door towards the unit, diagram 1. Be careful that the glass gasket does not roll up; there must be a gap between the gasket and the door lip to ensure that the door sits securely on the unit. See Diagram 2.

Diagram 1

Diagram 2

Use the hook to pull the spring out until you can put the hook into the slot on the bottom door bracket. Repeat for 2nd spring. See diagram 3.

To remove the flush door, reverse the above steps.

Diagram 3

To remove the flush door, reverse the above steps.

FACEPLATE & SAFETY SCREEN INSTALLATION

DVi34L Faceplate Assembly (Part #337-914)		
1		Faceplate
2		Safety Screen
3		Lip
4		Mesh Bottom Screen
5	948-042	Hinge and Hnge Support
6		Bottom Door

- 1) Position faceplate on unit lining up screw holes on faceplate with screw holes on unit - secure with 4 screws.

- 2) Install the bottom Hinges on unit - secure with 4 screws.

- 3) Install Mesh bottom screen below glass door - secure with 4 screws.

- 4) Install the Safety screen by hooking the top flange over the top of the glass door.

- 5) Install the bottom door.

- 6) Flip bottom louver up to close.

- 7) Insert the lip into the unit.

Completed Faceplate & Safety Screen Installation

INSTALLATION

OPTIONAL SPACER INSTALLATION (PART #337-918)

- 1) Place the spacer on a soft cloth on the floor. Slide the Right and left spacer into the top spacer (see image #1 below). Secure with 2 screws on each side (see image #2 below).

- 2) Place the faceplate on a soft cloth on the floor. Attach the spacer to the back of the faceplate with 2 screws on each side.

- 3) Spacer flange must be placed inside the faceplate flange (see picture below).

- 4) Secure the spacer clip at the bottom of the faceplate with 1 screw each side.

- 5) For faceplate installation see page .

INSTALLATION

FINAL CHECK

Before leaving this unit with the customer, the installer must ensure that the appliance is firing correctly. This includes:

- 1) Clocking the appliance to ensure the correct firing rate (rate noted on label) at 15 minutes.
- 2) If required, adjusting the primary air to ensure that the flame does not carbon. First allow the unit to burn for 15 min. to stabilize.
- 3) Check for proper draft.

CAUTION

Any alteration to the product that causes sooting or carboning that results in damage to the exterior facia is not the responsibility of the manufacturer.

WIRING

Caution: Ensure that the wires do not touch any hot surfaces and are away from sharp edges.

This unit is polarity sensitive and will not operate if polarity is incorrect.

CAUTION: Label all wires prior to disconnection when servicing controls. Wiring errors can cause improper and dangerous operation.

STANDARD WIRING

OPERATING INSTRUCTIONS

OPERATING INSTRUCTIONS

Before operating this appliance, proceed through the following check list.

- 1) Read and understand these Instructions before operating this appliance.
- 2) Check to see that all wiring is correct and enclosed to prevent possible shock.
- 3) Check to ensure there are no gas leaks.
- 4) Make sure the glass door is in place. Never operate the appliance with the door glass removed.
- 5) Verify that all flueing and the cap is unobstructed.
- 6) Verify log placement.
- 7) The unit should never be turned off and on again without a minimum of a 60 second wait.
- 8) When lighting the appliance, the inside of the glass may fog up. This will burn off after a few minutes of operation.

LIGHTING INSTRUCTIONS

- 1) Plug the power cord into a power outlet.
- 2) Press and release the ON/OFF switch once to start the unit. The LED will be lit.
- 3) After approximately 8 seconds the spark ignition system will spark for 8 seconds to light the main burner.
- 4) If the main burner does not light, repeat step 2 to restart the unit.

SHUTDOWN INSTRUCTIONS

- 1) Press the ON/OFF switch once.
- 2) The LED will flash.
- 3) Turn off all electric power to the appliance if service is to be performed.

FIRST FIRE

The **FIRST FIRE** in your heater is part of the paint curing process. To ensure that the paint is properly cured, it is recommended that you burn your fireplace for at least four (4) hours the first time you use it with the fan on.

When first operated, the unit will release an odour caused by the curing of the paint and the burning off of any oils remaining from manufacturing. Smoke detectors in the house may go off at this time. Open a few windows to ventilate the room for a couple of hours. The glass may require cleaning.

NOTE: The main burner will always start on "HIGH" and resume it's last setting after 20 seconds of operation.

NOTE: When the glass is cold and the appliance is lit, it may cause condensation and fog the glass. This condensation is normal and will disappear in a few minutes as the glass heats up.

DO NOT ATTEMPT TO CLEAN THE GLASS WHILE IT IS STILL *HOT!*

DO NOT BURN THE APPLIANCE WITHOUT THE GLASS FRONT IN PLACE.

REMOTE CONTROL

Use the Regency Remote Control Kit approved for this unit. Use of other systems may void your warranty.

The remote control kit comes with a hand held transmitter and a wall mounting plate.

- 1) Choose a convenient location to mount the hand held transmitter, protection from extreme heat is very important.

By using the wall mounting plate to house the transmitter, the remote can also be used as a wall thermostat.

SUMMARY OF CONTROLS

On/Off Button

If the unit is switched off, pressing and releasing this button once will switch the unit on. Flame height and fan speed will be at maximum. The unit will resume its last setting after a few seconds. If the unit is turned on, pressing and releasing the on/off button will switch the unit off.

Flame:

Increase - If the unit is switched on, pressing and releasing the flame plus (+) button once will increase the flame height to the next available high setting.

Decrease - If the unit is switched on, pressing and releasing the flame minus (-) button once will decrease the flame height to the next available low setting.

Fan:

If the unit is switched on, pressing and releasing the FAN button will change the fan speed to the next available setting.

FAN OPERATION

Pressing and releasing the plus (+) FAN button will change the fan speed as follows:

ON-> HIGH

Pressing and releasing the minus (-) FAN button will be the reverse of the above. This appliance has 2 speeds, ON & HIGH. The fan cannot be turned off during operation.

Fan must be running at all times when the unit is in operation.

ADJUSTING FLAME HEIGHT

There are six flame settings that can be adjusted by pressing and releasing the plus (+) and minus (-) FLAME button.

MANUAL ON/OFF CONTROL

The manual on/off button can be used to turn the unit on/off. Press the button once to turn the appliance on. Flame height will go to maximum and fan speed will go to HIGH. The appliance will resume its previous setting after a few seconds,

Note: Manual on/off cannot be used to adjust flame height or fan speed.

OPERATING INSTRUCTIONS

COPY OF LIGHTING INSTRUCTION PLATE

FOR YOUR SAFETY READ BEFORE LIGHTING

This appliance must be installed in accordance with local codes, if any; if not, follow the current CAN1-B149/ANSI Z 223.1, AS/NZS 5601

WARNING: If you do not follow these instructions exactly, a fire or explosion may result causing property damage, personal injury or loss of life. Improper installation, adjustment, alteration, service or maintenance can cause injury or property damage. Refer to the owner's information manual provided with this appliance. For assistance or additional information consult a qualified installer, service agency or gas supplier.

A) BEFORE LIGHTING smell all around the appliance area for gas. Be sure to smell next to the floor because some gas is heavier than air and will settle on the floor. WHAT TO DO IF YOU SMELL GAS <ul style="list-style-type: none">- Do not try to light any appliance- Do not touch any electric switch, do not use any phone in your building- Immediately call your gas supplier from a neighbors phone. Follow the gas supplier's instructions.- If you cannot reach your gas supplier, call the fire department.	B) Do not use this appliance if any part has been under water. Immediately call a qualified service technician to inspect the appliance and to replace any part of the control system and any gas control which has been under water. This appliance needs fresh air for safe operation and must be installed so there are provisions for adequate combustion and ventilation air.
---	---

CAUTION: Hot while in operation. Do not touch. Severe Burns may result. Due to high surface temperatures keep children, clothing and furniture, gasoline and other liquids having flammable vapors away. Keep burner and control compartment clean. See installation and operating instructions accompanying appliance.

LIGHTING INSTRUCTIONS

STOP! Read the safety information above on this label.

1) Plug the power cord into a power outlet.	3) After approximately 3 seconds the spark ignition system will spark for 25 seconds to light the main burner.
2) Press and release the ON/OFF button once to start the unit.	4) If the main burner does not light, check the gas and reset the unit.

TO TURN OFF GAS APPLIANCE

1) Press the ON/OFF button once.	2) Turn off all electric power to the unit if service is to be performed.
----------------------------------	---

DO NOT REMOVE THIS INSTRUCTION PLATE

918-332a

WARNING:

DO NOT SPRAY AEROSOLS IN THE VICINITY OF THIS APPLIANCE WHILE IN OPERATION.

DO NOT USE OR STORE FLAMMABLE MATERIALS IN OR NEAR THIS APPLIANCE.

DO NOT PLACE ARTICLES ON OR AGAINST THIS APPLIANCE.

DO NOT MODIFY THIS APPLIANCE.

In the event of power loss or outage, the appliance will shut down automatically. To return to normal operation, the appliance will have to be restarted. To restart, press the ON/OFF switch on the unit or on the remote.

"Appliances incorporating a live fuel effect and designed to operate with luminous flames may exhibit slight carbon deposition."

NORMAL OPERATING SOUNDS OF GAS APPLIANCES

It is possible that you will hear some sounds from your gas appliance. This is perfectly normal due to the fact that there are various gauges and types of steel used within your appliance. Listed below are some examples. All are **normal operating sounds** and should not be considered as defects in your appliance.

Blower:

Regency gas appliances use high tech blowers to push heated air farther into the room. It is not unusual for the fan to make a "whirring" sound when ON. This sound will increase or decrease in volume depending on the speed setting of your fan speed control.

Burner Tray:

The burner tray is positioned directly under the burner tube(s) and logs and is made of a different gauge material from the rest of the firebox and body. Therefore, the varying thicknesses of steel will expand and contract at slightly different rates which can cause "ticking" and "cracking" sounds. You should also be aware that as there are temperature changes within the unit these sounds will likely re-occur. Again, this is normal for steel fireboxes.

Gas Control Valve:

As the gas control valve turns ON and OFF, a dull clicking sound may be audible, this is normal operation of a gas regulator or valve.

Unit Body/Firebox:

Different types and thicknesses of steel will expand and contract at different rates resulting in some "cracking" and "ticking" sounds will be heard throughout the cycling process.

RESETTING THE UNIT

If the appliance goes to 'lockout', the system will have to be reset by depressing the reset button - located behind bottom louver.

***Important:** Wait at least 5 min for any unburned gas to clear before resetting the appliance.

1) Open the bottom louver on the unit.

2) With the unit switched on, press and release the reset button once. The button is located near the gas valve. Wait for approximately 3 seconds - the pilot sparks can be heard and seen. It will take approximately 2 to 3 seconds for the flame to light.

NOTE: Wait 30 seconds between reset attempts.

MAINTENANCE

MAINTENANCE INSTRUCTIONS

Any maintenance required accessing the glass door of the unit must be performed by an authorized service person.

- 1) Always unplug the power cord before cleaning. For relighting, refer to lighting instructions. Keep the burner and control compartment clean by brushing and vacuuming at least once a year. When cleaning the logs, use a soft clean brush as the logs are fragile and easily damaged.
- 2) Clean glass (never when unit is hot), appliance, louvres, and door with a damp cloth. Never use an abrasive cleaner. The gold louvres (and optional gold door) may be scratched if abrasives are used to clean them.

The heater is finished in a heat resistant paint and should only be refinished with heat resistant paint (not with wall paint). Regency uses StoveBright Paint - Metallic Black #6309.

- 3) Make a periodic check of burner for proper position and condition. Visually check the flame of the burner periodically, making sure the flames are steady; not lifting or floating. If there is a problem, call an authorized service person.
- 4) The appliance and flueing system must be inspected before use, and at least annually, by an authorized field service person, to ensure that the flow of combustion and ventilation air is not obstructed.

During the annual service call, the burners should be removed from the burner tray and cleaned. Replace the embers - do not block the burner ports.

- 5) Keep the area near the appliance clear and free from combustible materials, gasoline and other flammable vapours and liquids.
- 6) Verify proper operation after servicing.

WARNING: CHILDREN AND ADULTS SHOULD BE ALERTED TO THE HAZARDS OF HIGH SURFACE TEMPERATURE AND SHOULD STAY AWAY TO AVOID BURNS OR CLOTHING IGNITION. YOUNG CHILDREN SHOULD BE CAREFULLY SUPERVISED WHEN THEY ARE IN THE SAME ROOM AS THE APPLIANCE.

CAUTION: ANY SAFETY SCREEN OR GUARD REMOVED FOR SERVICING AN APPLIANCE MUST BE REPLACED PRIOR TO OPERATING THE APPLIANCE.

CLOTHING OR OTHER FLAMMABLE MATERIAL SHOULD NOT BE PLACED ON OR NEAR THE APPLIANCE.

DO NOT USE THIS APPLIANCE IF ANY PART HAS BEEN UNDER WATER. IMMEDIATELY CALL AN AUTHORIZED SERVICE TECHNICIAN TO INSPECT THE APPLIANCE AND TO REPLACE ANY PART OF CONTROL SYSTEM AND ANY GAS CONTROL WHICH HAS BEEN UNDER WATER.

LOG REPLACEMENT

The unit should never be used with broken logs. Unplug the power cord and allow the unit to cool before opening door to carefully remove the logs. If for any reason a log should need replacement, you must use the proper replacement log. The position of these logs must be as shown in the diagram under Log Installation.

Note: Improper positioning of logs may create carbon build-up and will alter the unit's performance which is not covered under warranty.

DOOR GLASS REPLACEMENT

Your Regency stove is supplied with high temperature, 5 mm Neoceram ceramic glass that will withstand the highest heat that your unit will produce. In the event that you break your glass by impact, purchase your replacement from an authorised Regency dealer only, and follow our step-by-step instructions for replacement.

WARNING: do not operate appliance with the glass front removed, cracked or broken. Replacement of the glass should be done by a licensed or authorised service person.

Flush Glass Replacement

Slide old glass out of the side frames and replace with new glass.

GLASS GASKET

If the glass gasket requires replacement use glass gasket (Part # 936-155).

FAN MAINTENANCE

To Remove Fan:

- 1) Turn the unit off and allow it to cool to room temperature,
- 2) Unplug or disconnect power source to gas fire.
- 3) Open the bottom louvre.
- 4) Remove screws that secure protective screen.
- 5) Remove door frame and screen
- 6) Remove the ECS harness from the back clip.
- 7) Pull out the ECS box.
NOTE: The ECS box is held in place with velcro.
- 8) Remove the 2 screws that secure the fan in place.

- 9) Carefully slide the fan to the front, rotate it 45 degrees and slide it out simultaneously with the ECS box.

- 10) Disconnect all the connectors from the fan and resistor.
- 11) Remove the fan ground cable.
- 12) Reverse the above steps to install the new fan.

MAINTENANCE

VALVE ASSEMBLY REPLACEMENT

- 1) Unplug or disconnect the power source to the stove and shut off gas supply.
- 2) Open bottom louvre and remove protective screen.
- 3) Remove the door frame and safety screen.
- 4) Remove the glass door, logs, and black or stainless inner liner, if installed.
- 5) Remove the rear log tray, burner and grate.

- 6) Disconnect gas line from the valve.
- 7) Remove the firebox base plate by removing the 10 screws which hold it in place.

- 8) Remove all the wire connectors from the valve and spark ignitor.
- 9) Remove the valve tray assembly.
- 10) To replace the valve tray assembly, simply reverse the above steps.

INNER PANEL REMOVAL AND INSTALLATION

- 1) Remove safety screen/guard.
- 2) Remove the glass door by undoing 2 latches. Lift up and out. Refer to pages 18 and 19 in the manual for detailed instructions.

- 3) Remove all the logs if installed and set aside carefully.
- 4) Loosen the 4 screws securing the brackets that hold the existing back and both side panels in place.

- 5) Remove the two back brackets and screws (set aside) first, then remove the back panel by lifting it up slightly, tilt it forward, then lift it out.

- 6) Remove the two side brackets and screws (set aside) - then remove the side panels by tilting the top in and lifting them out.

- 7) To install, do steps 6 to 1 in that order.

NOTE: When re-installing the back panel, ensure the bottom lip is tucked behind the rear log tray.

TROUBLESHOOTING GUIDE

ALL WORK MUST BE CARRIED OUT BY A LICENSED/QUALIFIED TECHNICIAN		
It is critical that this appliance is earthed and that Active and Neutral are not crossed		
* Pilot light models only		
SYMPTOM	CAUSE	SOLUTION
Unit does not operate (No ignition & No Fan)	No power supply (240V) to unit or control box	Check 240V power supply
	Faulty ECS box	Replace ECS module & Cat 5 Cable
Unit will not operate using remote control, but OK using manual control	Remote control not tuned into unit.	Tune remote control into unit
	Remote is not tuning to the unit	Replace Remote control and or ECS module
* Unit goes through ignition cycle, but pilot light does not ignite Direct Spark units Igniter sparks but main burner doesn't light	No gas to unit or fitting line has not been purged	Check gas supply or purge fitting line
	* Blocked pilot	* Clean or replace pilot assembly
	Faulty ignition pack	Replace Ignition pack
	Ignitor earthing or sparking to incorrect location	Ensure sparker is in good condition, replace if necessary
* Pilot light ignites but main burner does not ignite, igniter continues to spark for 10 seconds then goes to lock out Direct Spark units Main burner ignites but igniter continues to spark for 10 seconds then goes to lock out	Faulty sensor lead/ circuit	Check flame sensor is connected and not damaged
	Crossed polarity, Faulty extension lead or power board	Check polarity at power point connection into heater and ECS control box
	Faulty Ignition Module	Replace Ignition module
* Pilot light ignites but main burner does not ignite, igniter stop sparking and pilot flame stays on	No Gas to main burner	Check burner injector for blockage
	Pressure switch not activating	Ensure Fan is running
		Clear any blockage in hose from pressure switch to fan.
		Clean the fan
	Replace Pressure switch	
No power out of ignition module	Replace Ignition Module	

TROUBLESHOOTING GUIDE

Unit ignites, main burner becomes unstable, flame lifts off burner, unit goes into lockout	Incorrect burner pressure settings	Adjust burner pressure to correct setting (See Data plate)
	Flue blocked, Incorrect flue installation or flue joints not sealed	Clear blocked flue, install flue correctly and seal all flue joints
	Burner aeration not correctly adjusted	Adjust burner aeration (See Unit Manual)
	Log set incorrectly installed	Install log set as per Owner's Manual
	Flue Restrictor not set correctly	Adjust Flue restrictor (See unit manual)
Fan operates but no ignition sequence (no spark)	Unit ignition pack gone into lockout	Reset ignition pack by depressing black reset button while unit controls are in the "ON" position (fan running)
Carbon build up on glass/media/logs	Burner cracked	Replace burner
	Log set / media incorrectly installed	Install log set / media as per owner's manual
	Aeration setting too far closed	Set aeration as per owner's manual
	Aeration blocked	Clean blockage at aeration shutter
	Flue restrictor not set correctly	Adjust flue restrictor as per owner's manual
	Partial blockage in flue	Clear blocked flue

MAINTENANCE

GAS APPLIANCE MAINTENANCE

In order for your Regency appliance to continue to provide comfort to your home periodic maintenance must be performed to ensure it is operating at peak efficiency. The items in the list should be checked by a licensed gas service technician during the annual service check. Your unit may require more frequent maintenance checks if you notice any changes in how it operates. Operational changes to look for can include, but are not limited to, extended start up time, increased fan noise, residue/carbon build up, white build up on the glass/firebox, increased operating noise etc. Should any of these or other conditions arise, discontinue use and schedule a service check with your local licensed gas technician. The list below shows items your licensed service technician will need to check and service at least annually.

Clean

- Glass
- Interior bricks / panels
- Burner ports & burner air shutter
- Fan blades
- Log set
- Pilot orifices
- Pilot hood (change as needed)
- Flame sensor (electronic ignition models)
- Flame electrode
- Burner orifice
- Thermocouple (millivolt models)
- Thermopile (millivolt models)

Inspect

- Pilot assembly
- Burner
- Pressure relief gaskets/doors
- Flue connector gasket if present
- Door seal
- Firebox
- Venting
- Batteries (remote handheld, remote receiver, DC sparker, change as needed)
- Burner media (change as needed)
- Air shutter setting
- Wiring

Check

- Voltage on thermocouple/thermopile (millivolt models)
- Ohms reading on flame sense (electronic ignition models)
- Inlet/outlet fuel pressures as per rating plate
- Voltage/ohms readings on gas valve
- Ohms reading to on/off switch circuit (Millivolt models)

Gas Leak Tests

- Check main gas line connection to valve
- Check shut off valve connections
- Check connection at gas valve outlet
- Check connection at main burner orifice
- Check pilot fuel line at valve and at pilot assembly

WARRANTY

Limited Lifetime Warranty

FPI Fireplace Products International Ltd. (“the manufacturer”) through its wholly owned subsidiary, Fireplace Products Australia Pty Ltd (for Australia and New Zealand customers) and sold under the Regency® brand of fireplace products (collectively referred to herein as “FPI”), extends this Limited Lifetime Warranty to the original purchaser of this appliance provided the product remains in the original place of installation. The items covered by this limited warranty and the period of such coverage is set forth in the table below.

Some conditions apply (see below).

The policy is not transferable, amendable or negotiable under any circumstances.

Indoor Gas Products Warranty Coverage Parts and Labor	Part				Supplier Warranty	Labor Coverage (Years)
	Lifetime	5 years	2 years	1 year		
Firebox and Heat Exchanger	✓					3
Steel Burner Tube	✓					3
Glass Thermal breakage only	✓					3
All Surrounds/Inlays Finishes		✓				3
Brick Panels/Log sets/Ceramic Burners		✓				3
All Castings		✓				3
Valve assembly and all gas control components (Pilot assembly, flame sensors, Spark Electrode, Pilot Tubing, Orifices, Thermocouple, Thermopile)			✓			2
All Other Electrical components with the exception of WIFI Dongle (Ignition Control Boards, Wiring, Switches, Fans, Fan Control Module, Battery Pack, Remote Control Systems)			✓			1
Enamel Panels			✓			1
Venting/Venting Components			✓			1
All Stainless steel surrounds				✓		1
All Firebox Media (Crystals, Fire beads, Volcanic, Ceramic & Spa Stones)				✓		1
All hardware				✓		1
Mesh/Glass Safety Barriers				✓		1
Accent Light Bulbs				✓		1
Glass (Crazing)				✓		1
WIFI Dongle (Applicable Models)				✓		1

After the original warranty coverage for any of the parts above have expired, any repair and/or replacement parts purchased by the consumer from FPI or through an accredited distributor or dealer will carry a ninety (90) day warranty (valid only with an original copy of the tax invoice). No labor coverage is included with any repair and/or replacement part.

Replacement parts are limited to one per warranty term.

Conditions:

Warranty protects against defect in manufacture or FPI factory assembled components only, unless herein specified otherwise. This warranty will only apply to those products which are acquired at the time of this warranty being effective. FPI will not be liable for any damage or loss that falls outside the scope of the warranty.

Any part(s) found to be defective during the warranty period as outlined above will be repaired or replaced at FPI's option through an accredited distributor, dealer or pre-approved and assigned agent provided that the defective part is returned to the distributor, dealer or agent for inspection if requested by FPI. Alternatively, FPI may at its own discretion fully discharge all of its obligations under the warranty by refunding the verified purchase price of the product to the original purchaser. The purchase price must be confirmed by an original copy of the tax invoice.

The authorised selling dealer, or an alternative authorised FPI dealer if pre-approved by FPI, is responsible for all in-field diagnosis and service work related to all warranty claims. This warranty does not cover dealer travel costs for diagnostic or service work. Dealers may charge homeowner for travel and additional time. Check with your selling dealer in advance for any costs to you when arranging a warranty call. FPI is not responsible for results or costs of workmanship of unauthorised FPI dealers or agents in the negligence of their service work. Additional service fees may apply if you are seeking warranty service from a dealer other than the dealer from whom you originally purchased the product.

At all times FPI reserves the right to inspect reported complaints on location in the field claimed to be defective and determine whether the warranty will apply prior to processing or authorising of any claim. Failure to allow this upon request will void the warranty.

All warranty claims must be submitted by the dealer servicing the claim, including an original copy of the tax invoice (proof of purchase by you). All claims must be complete and provide full details as requested by FPI to receive consideration for evaluation, including proof of maintenance records. Incomplete claims may be rejected. FPI has absolute discretion to assess and determine any warranty claim and may accept or reject a claim as it considers appropriate. Any part or parts of the unit found to be defective will be repaired or replaced at FPI's option, through an accredited distributor or service agent provided that the defective part be returned to the distributor or agent, **Transportation Prepaid**, if requested. **It is the general practice of FPI to charge for larger, higher priced replacement parts and issue credit once the replaced component has been returned to FPI and evaluated for manufacturer defect.**

If a consumer has a unit installed outside an accredited distributor, dealer or pre-approved service agent's service area, or the closest approved service agent is situated more than thirty (30) kilometres from the installation, FPI is not obliged to arrange warranty repairs or shipping/transportation costs. In these cases, the consumer must arrange warranty service with its selling dealer, and shipping, travel and/or additional labor charges will apply.

Unit must be installed according to all manufacturers' instructions as per the manual.

All Local and National required codes must be met.

The installer is responsible to ensure the unit is operating as designed at the time of installation.

The original purchaser is responsible for annual maintenance of the unit, as outlined in the owner's manual. As outlined below, the warranty may be voided due to problems caused by lack of maintenance. Annual maintenance records should be retained.

Repair/replacement parts purchased by the consumer from FPI after the original coverage has expired on the unit will carry a 90 day warranty, valid with a receipt only. Any item shown to be defective will be repaired or replaced at our discretion. No labor coverage is included with these parts.

Exclusions:

This Limited Lifetime Warranty does not extend to paint, rust or corrosion of any kind due to a lack of maintenance or improper venting, combustion air provision, corrosive chemicals (i.e. chlorine, salt, air, etc.), door or glass gasket.

Malfunction, damage or performance based issues as a result of environmental conditions, location, chemical damages, downdrafts, installation error, installation by an unqualified installer, incorrect chimney components (including but not limited to cap size or type), operator error, abuse, misuse, use of improper fuels, accidents, lack of regular maintenance and upkeep, acts of God, weather related problems from hurricanes, tornados,

WARRANTY

earthquakes, floods, lightning strikes/bolts or acts of terrorism or war, which result in malfunction of the appliance are not covered under the terms of this Limited Lifetime Warranty.

FPI has no obligation to enhance or modify any unit once manufactured (i.e. as products evolve, field modifications or upgrades will not be performed on existing appliances).

Any unit showing signs of neglect or misuse will not be covered under the terms of this warranty policy and may void this warranty. This includes units with rusted or corroded fireboxes which have not been reported as rusted or corroded within three (3) months of installation/purchase. Any alteration to the unit which causes sooting or carboning that results in damage to the exterior fascia or over firing that can cause component or firebox/heat exchanger failure will not be covered by this warranty.

Units which show evidence of being operated while damaged, or with problems known to the purchaser and causing further damages will void this warranty.

Units where the serial no. has been altered, deleted, removed or made illegible will void this warranty.

Minor movement, expansion and contraction of the steel is normal and is not covered under the terms of this warranty.

Freight damages for products or parts are not covered under the terms of the warranty.

Porcelain/Enamel: Absolute perfection is neither guaranteed nor commercially possible. Any chips must be reported and inspected by the authorised selling dealer within three (3) days of installation. Any damage of this type not reported after this time period will be subject to rejection and any related warranty will not apply.

Special Finishes: Expect some changes in color as the product "ages" with constant heating and cooling. The manufacturer warranty does not cover tarnishing, changing colors and/or marks (i.e. finger prints, etc.) after the purchase of the product. Damage from the use of abrasive cleaners is not covered by warranty.

Products made or provided by other manufacturers and used in conjunction with the FPI appliance without prior authorisation from FPI may void this warranty.

INCORRECT INSTALLATION OR GAS PRESSURE SETTINGS ARE NOT COVERED BY WARRANTY. A SERVICE OR CALLOUT FEE WILL BE CHARGED IN THESE CIRCUMSTANCES.

Limitations of Liability:

1. Exclusion of implied terms

The customer may have the benefit of consumer guarantees under the Australian Consumer Law. To the maximum extent permitted by law, all terms, conditions or warranties that would be implied into this Warranty or in connection with the supply of any goods or services by the supplier under law or statute or custom or international conventions are excluded.

2. Limitation of liability

(a) To the maximum extent permitted by law and subject to clauses 1 and 3, the supplier's total liability arising out of or in connection with its performance or its obligations pursuant to this Warranty, or arising out of or in connection with the supply of specific goods or services (including pursuant to or for breach of this Warranty, under statute, in equity or for tort, including negligent acts or omissions) is limited as follows: (i) the supplier shall have no liability to the customer for any Consequential Loss; (ii) without limiting the effect of clause 2(a)(i), the supplier's total aggregate liability for Loss, however arising, shall not exceed the GST exclusive aggregate price paid by the customer to the supplier for the specific goods or services that gave rise to the Loss in question.

(b) The limitations and exclusions in this sub-clause do not apply to the extent that any Loss is directly attributable to: (i) the personal injury or death caused by the supplier's default, breach of this Warranty or negligence; or (ii) fraud by the supplier.

(c) Each party must take reasonable steps to mitigate any Loss it suffers or incurs.

3. Limitation of liability under Australian Consumer Law Guarantees

(a) To the extent that goods supplied by the supplier are not goods of a kind ordinarily acquired for personal, domestic or household use and the customer is deemed to be a consumer for the purposes of section 64A of the Australian Consumer Law, the customer agrees that the supplier's liability for a failure to comply with a consumer guarantee that the customer may have a benefit under the Australian Consumer Law (other than a guarantee under sections 51 (title), 52 (undisturbed possession) and 53 (undisclosed securities)), is limited to, at the option of the supplier, one or more of the following: (i) replacement of the goods or the supply of equivalent goods; (ii) the repair of the goods; (iii) the payment of the cost of replacing the goods or of acquiring equivalent goods; or (iv) equivalent goods; or (v) the payment of the cost of having the goods repaired.

(b) To the extent that services supplied by the supplier are services other than services of a kind ordinarily acquired for personal, domestic or household use or consumption, the supplier's liability for failure to comply with a consumer guarantee that the customer may have the benefit of is limited to, at the option of the supplier: (i) the supply of the services again; or (ii) the payment of the cost of having the services supplied again.

4. Subject to Change

This Limited Warranty is given at the time of sale and purchase of the relevant fireplace product. The terms of this Limited Warranty may be amended from time to time by FPI in accordance with changes to business practices, consumer laws or other legal requirements. The rights and protections granted under the Limited Warranty are those in force in relation to a fireplace product at the time and in the place of sale of that product, and only those terms will be applicable in respect of that product.

5. Severability

Any term of this Limited Warranty that is invalid or unenforceable in any jurisdiction is to be read down for the purposes of that jurisdiction, if possible, so as to be valid and enforceable, and is otherwise capable of being severed to the extent of the invalidity or unenforceability, without affecting the remaining provisions of this Limited Warranty or affecting the validity or enforceability of that provision in any other jurisdiction.

6. Definitions

For purposes of clauses 1, 2 and 3:

(a) Consequential Loss means loss of expected savings, loss of use, loss of opportunity, loss of profit, loss of revenue, increased financing costs, loss arising from delay, or any consequential, special or indirect loss or damage, whether or not the possibility or potential extent of the loss or damage was known or foreseeable, and whether arising from a claim under indemnity, contract, tort (including negligence), statute or otherwise.

(b) Loss means any expense, cost or damage of any kind and includes Consequential Loss and a fine or penalty imposed by a statutory or other authority.

WARRANTY

How to Obtain Warranty Service:

Customers should contact the authorised selling dealer to obtain warranty service. In the event the authorised selling dealer is unable to provide warranty service, please contact FPI by mail at the address listed below. Please include your name, address, purchase date, selling dealer, serial #, type of unit, a brief description of the problem, email and telephone contact information, and a copy of your original tax invoice. A representative will contact you to make arrangements for an inspection and/or warranty service. (See below for Western Australia and/or New Zealand)

Please note Fireplace Products Australia Pty Ltd does not provide installation services.
