Learn more about
City Series line:

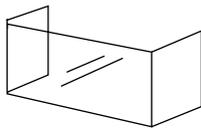

multiple configurations available

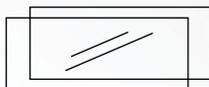

NEW YORK VIEW
Single Sided

A simple yet elegant statement that ties your living space together and elevates any wall with its seamless, linear look.

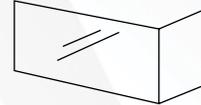

SAN FRANCISCO BAY
Three Sided

Creates a focal point that sparks conversations and creates a comforting ambiance in your cozy home.

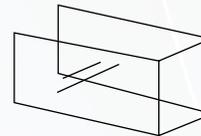

SEATTLE SEE-THROUGH
See-Through

Versatile architectural element allows you to enjoy a clear, frameless view of the fire from two rooms.

CHICAGO CORNER
Corner Left or Right

Provides design freedom due to its ability to act as a show stopping standalone or a flattering accent in any area.

SANTA MONICA PIER
Pier Left or Right

Allows you to enjoy dynamic views from all angles in your living space as you lounge in the warmth of vivid flames.

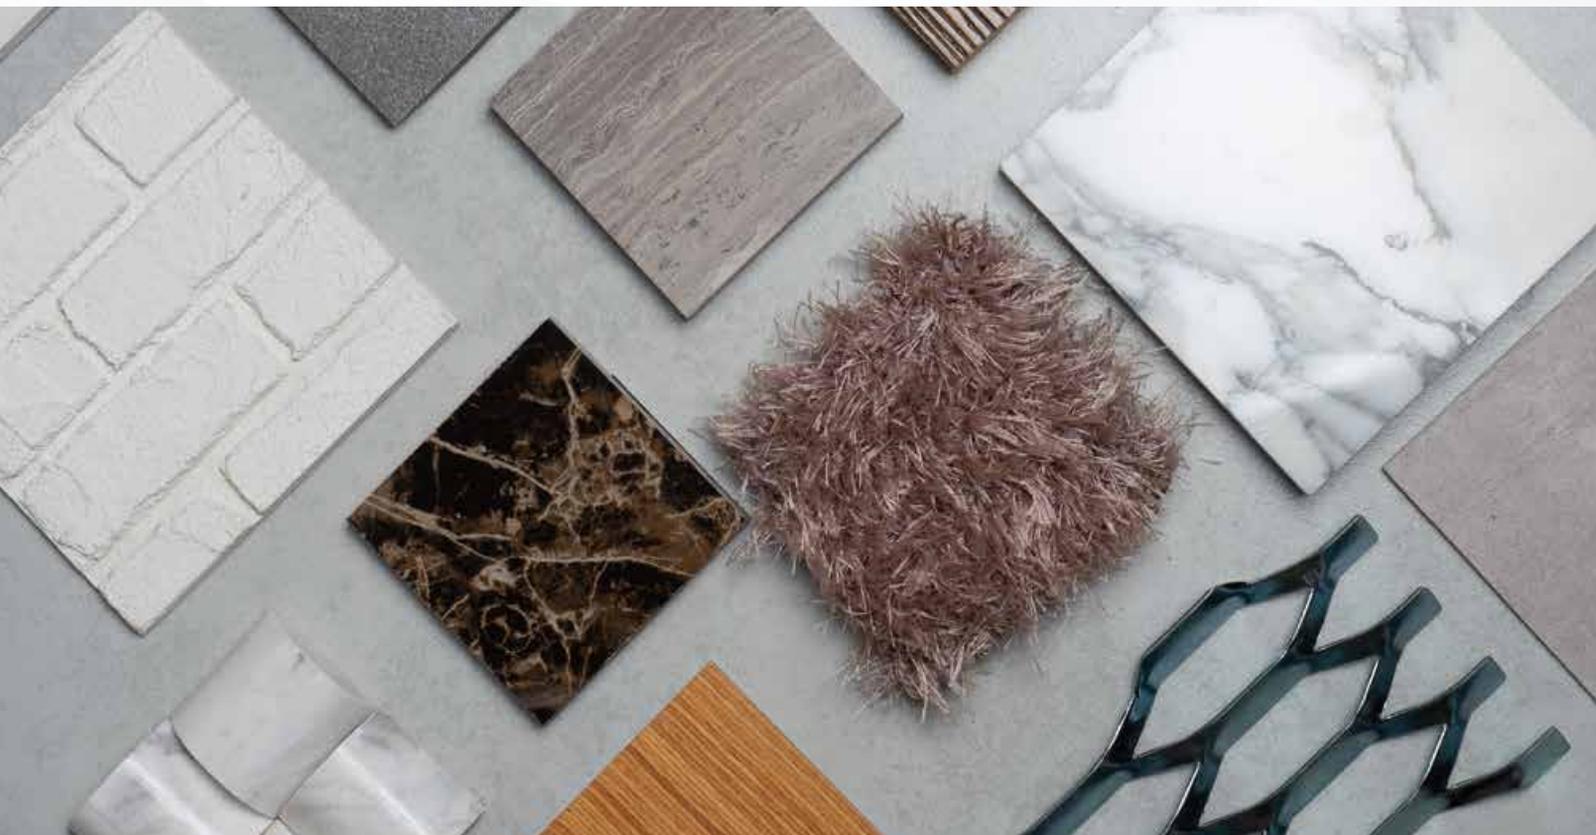

6 **UNIT SHOWN:** San Francisco Bay 60 shown with black reflective crystals, crushed black coal glass, split oak log set and black glass inner reflective panels.

unlimited finishes. no limits. no restrictions.

Designed to maintain a cool wall to accommodate custom finishes right to the edge of your fireplace. Complete your fireplace look with:

- Wood
- Marble
- Glass
- Metal
- Tile
- Fabric
- Faux Stone

extended view panels

Flush to wall extended view panels center the fire, enhance opulence, and create visual balance. Through this extension, these black glass reflective panels create a sleek look that is complimentary to various architectural elements.

- Create the illusion of a larger fireplace
- Establish balance on a multi-function fireplace feature wall
- Black glass reflective finish amplifies the flame experience
- Can be used on New York 40, 50, 60 & 72 models to extend the length by 24"

1

In this photo, the fireplace is overshadowed by a large television, creating a top heavy fireplace feature wall

2

In this photo, the fireplace achieves visual prominence and balance with the addition of black glass extended view panels

corner installation kit

The corner installation kit transforms a San Francisco Bay 50, 60 or 72 into a Chicago Corner creating a stunning large-faced corner unit unlike anything you have ever seen before.

28 UNIT SHOWN: New York 40 shown with black reflective crystals, crushed black coal glass, split oak log set and black steel inner panels.

controllable warmth

FLEXIBLE VENTING OPTIONS

Regency's patented cool wall system releases heat at ceiling level which helps evenly distribute the airflow throughout the living space. Through this natural convection of air, excessive radiant heat is reduced and you are able to enjoy the utmost comfort and lounge in the warmth of beautiful flames more often.

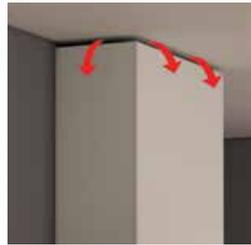

- Enjoy the flexibility to choose from 3 different chase vent solutions
- Release warmth into the room discreetly

Front

Side(s)

Top

APP CONTROL

Put the power of flame directly in your hand. With the Proflame Connect Plus App, you can take control of your fireplace turning it on/off, adjusting the flame height, and temperature of your gas fireplace directly on your smartphone. The optional Wi-Fi enabled module provides the ultimate fireplace control.

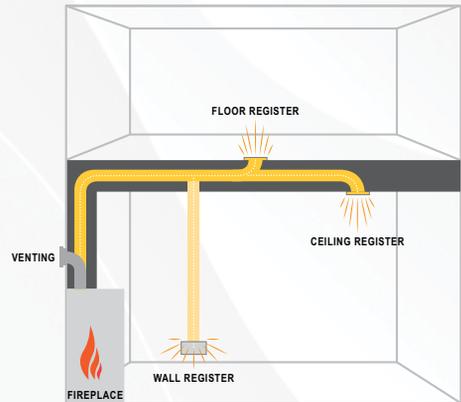

cool wall system

Our patented cool wall system helps maintain the perfect wall surface temperature around the fireplace. The floating glass safety barrier draws in the cool air which is split between the heat exchanger and the inside wall surface. Within the heat exchanger, the air is heated and then directed out the back of the fireplace.

heat distribution kit

Increase the effectiveness of your fireplace by dispersing warm air from the fireplace to remote locations in the same room or other rooms in your home by using the Heat Wave™ power duct system.

Available on select models.

UNIT SHOWN: Santa Monica Pier 50 shown with black reflective crystals, volcanic stones in tan and black enamel inner reflective panels.

power vent systems

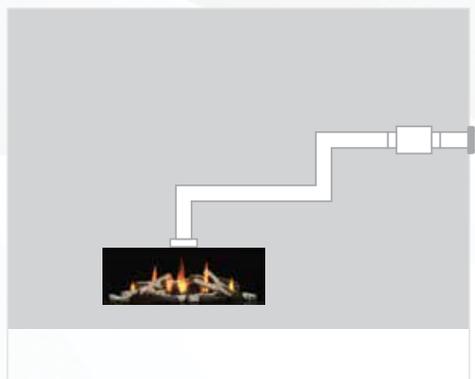

Regency's power vent systems have longer vertical and horizontal vents. Due to this functionality, designers and architects are able to build with freedom and flexibility to find the perfect space for your fireplace.

INLINE POWER VENT SYSTEM

- Allows for both vertical and horizontal termination (Horizontal terminations can use Regency's AstroCap)
- For vertical terminations the Simpson Duravent high wind cap is used
- Vent runs up to 72 ft. (rigid pipe approved for up to 72 ft. & flex pipe approved for up to 40 ft.)
- Use up to six 90° elbows or twelve 45° elbows
- Use flex vent or rigid pipe
- Access panel required for servicing inline power vent

Inline Power Vent system shown
vertical vent run

Inline Power Vent system shown
horizontal vent run

FLUSH HORIZONTAL TERMINATION POWER VENT

- Horizontal power vent wall termination cap (End of line power vent only) can be installed flush or adjusted to the depth of your wall
- No access panel required for servicing, unless the cap is not accessible from the exterior of home
- Can be painted to match the exterior of outside wall
- Vent runs up to 72 ft. (rigid pipe approved for up to 72 ft. & flex pipe approved for up to 40 ft.)
- Allows for 6 ft. (72") of negative vent run below first elbow
- Use up to six 90° elbows or twelve 45° elbows
- Use flex vent or rigid pipe

End of line flush horizontal Power Vent
system shown in a negative vent run

Horizontal Flush Power Vent Cap
(Used on End of line applications)

Horizontal Direct Vent Astro Cap
(Used on Inline power vent applications)
